# ***Getting started***

---

The topics in this section will introduce you to your phone, help you get set up with service, provide an overview of the phone screen, and get you started with basic phone operations.

# *Introduction*

The following topics describe the basics of using this guide and your new phone.

## *About the user guide*

Thank you for purchasing your new Wiko RIDE™. The following topics explain how best to use this guide to get the most out of your phone.

### ***Before using your phone***

Read the Quick Start Guide that is located on your phone within Settings thoroughly for proper usage.

Accessible services may be limited by subscription contract conditions.

### ***Descriptions in the user guide***

Note that most descriptions in this guide are based on your phone's setup at the time of purchase. Unless otherwise noted, instructions begin from the phone's home screen, which is displayed by pressing **Home** button . Some operation descriptions may be simplified.

### ***Screenshots and key labels***

Screenshots and other illustrations in this user guide may appear differently on your phone. Key labels in the user guide are simplified for description purposes and differ from your phone's display.

### ***Other notations***

In the user guide, the phone may be referred to either as "phone," "device," or "handset." A microSD™ or microSDHC™ card is referred to as an "SD card" or a "memory card."

# Set up your phone

The following topics give you all the information you need to set up your phone and wireless service the first time.

## Parts and functions

These topics illustrate your phone's primary parts and key functions.

**Note:** Your phone's screens and apps layouts are subject to change. This user guide uses sample images only.

### Phone Layout

Part	Description
<b>Front camera</b>	Take pictures and record videos while facing the screen and allow you to video conference.
<b>Receiver</b>	Hear the caller and automated prompts.
<b>Touchscreen</b>	Display all the information needed to operate your phone, such as the call status, the Contacts list, and the date and time. Also provides one-tap access to all of your features and applications.
<b>Power key</b>	Press to turn the screen on or off. Press and hold to switch the phone on or off, to restart it, or to take a screenshot on the current screen.
<b>Charger/Accessory jack</b>	Connect the USB cable (included) for charging or connect other accessories.
<b>Volume keys</b>	Adjust the volume for ringtones, media, notifications, and system sounds.
<b>Headset jack</b>	Plug in either an optional stereo headset or an optional headset for convenient, hands-free conversations.
<b>Microphone</b>	Used for transmitting your voice electronically for a call, voice recording, or video recording.

**CAUTION!** Inserting an accessory into the incorrect jack may damage the phone.

## *Battery use*

The following topics explain how to insert and remove your phone's battery.

### **Battery cautions**

**Storage:** Avoid storing or leaving battery with no charge remaining. Saved information and settings may become lost or changed, or battery may become unusable. Charge once every six months before storing or leaving unused for a long period.

**Bulges:** Depending on use, bulges may appear near end of battery life. This does not affect safety.

**Replacing battery:** The battery is a consumable item. It needs to be replaced if operating time shortens noticeably. Purchase a new battery.

**Cleaning:** Clean soiled terminals between battery and phone with a clean, dry cotton swab. Soiled terminals can result in a poor connection and prevent charging, etc.

### *Insert the battery*

Follow these instructions to insert your phone's battery safely and properly.

1. Remove the battery cover.

Lift gently in the direction shown.

2. Insert the battery.

Align the contacts of the battery with the contacts in the phone and gently press the battery down into place.

3. Attach the battery cover.

Make sure that all the tabs are secure and there are no gaps around the cover.

## *Remove the battery*

Follow these instructions to remove your phone's battery. Always power the phone off before removing the battery.

1. Remove the battery cover.

2. Remove the battery.

Lift upward gently as shown.

## *Charge the battery*

Follow these instructions to charge your phone's battery using either the included AC adapter or via a USB connection on your computer.

### ***Charge using the AC adapter***

1. Plug the USB connector into the charger/accessory jack on the bottom of your phone.

2. Plug the other end of the USB cable into the AC adapter.
3. Plug the AC adapter into an electrical outlet.

The indicator light illuminates when charging starts. The light turns to green when the battery is fully charged. Fully charging a battery may take up to 3.5 hours.

4. After charging, disconnect the phone from the charger.

Unplug the AC adapter from the outlet and remove the USB cable from the phone and the AC adapter.

### ***Charge using a PC connection***

Before using a PC connection to charge your phone, ensure that the computer is turned on. Depending on the type of connection, your phone's battery may not charge.

1. Insert the small end of the USB cord into the charger/accessory jack on the bottom of your phone.

2. Insert the large end of the USB cord into an external USB port on your computer.
3. After charging, remove the USB cable from both the phone and the computer.

## *SIM card*

The SIM card is an IC card containing phone number and other customer information. Your phone's SIM card is preinstalled and should only be accessed if directed by a customer service representative.

## *SD card*

Your phone supports the use of an optional SD card (not included) to expand its storage capacity. It supports cards up to 32 GB. Some cards may not operate properly with your phone.

### **SD card cautions**

**Data:** Information stored on an SD card can become lost or changed accidentally or as a result of damage. It is recommended that you keep a separate copy of important data. Wiko is not responsible for damages from data that is lost or changed.

**Reading/Writing data:** Never power off or remove the battery while reading or writing data.

**Battery level:** A low battery charge may prevent reading/writing to an SD card.

**Handling SD card:** Use/store SD cards away from the reach of infants, otherwise it may cause choking if swallowed.

### *Insert an SD card*

Follow these steps to insert an optional SD card (not included).

1. Remove the battery cover.
2. Insert SD card.

Insert SD card all the way gently without bending and with terminals facing down.

3. Insert the battery and attach the battery cover (see [Insert the battery](#)).

### *Unmount an SD card*

Always unmount an SD card before removing it from your phone to avoid corrupting or damaging the files in the storage card.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Storage** > .

Your SD card is now safely ejected. To use this SD card again, you will need to mount it first by the following steps:

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Storage** > **SD card**.
3. Tap **MOUNT** on the prompted screen.

### *Remove an SD card*

Follow these instructions to remove an SD card.

1. Remove the battery cover (see [Remove the battery cover](#)).
2. Remove SD card.

3. Attach the battery cover (see [Attach the battery cover](#)).

### *Format an SD card*

When you insert an optional SD card for the first time, it is recommended that you format it on your phone. When formatting an SD card, you should back up your music and photo files that are stored on the card as formatting the SD card deletes all the stored data.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Storage > SD card**.

3. Tap  to access options menu, and tap **Storage settings**.
4. Select **Format** or **Format as internal**, and then tap **FORMAT SD CARD** to confirm.

All data on the SD card is erased, and the card is formatted for use on your phone.

## *Turn your phone on and off*

The instructions below explain how to turn your phone on and off.

### ***Turn your phone on***

Press and hold the **Power** key until the device turns on.

### ***Turn your phone off***

1. Press and hold the **Power** key.
2. Tap **Power off**.

## *Use the touchscreen*

Your phone's touchscreen lets you control actions through a variety of touch gestures.

### ***Tap or touch***

When you want to type using the onscreen keyboard, select items onscreen such as application and settings icons, or press onscreen buttons, simply tap or touch them with your finger.

### ***Touch and hold***

To open the available options for an item (for example, a contact or link in a Web page), touch and hold the item.

### ***Swipe or slide***

To swipe or slide means to quickly drag your finger vertically or horizontally across the screen.

### ***Drag***

To drag, press and hold your finger with some pressure before you start to move your finger. While dragging, do not release your finger until you have reached the target position.

### ***Flick***

Flicking the screen is similar to swiping, except that you need to swipe your finger in light, quick strokes. This finger gesture is always in a vertical direction, such as when flicking the contacts or message list.

### ***Rotate***

For most screens, you can automatically change the screen orientation from portrait to landscape by turning the phone sideways. When entering text, you can turn the phone sideways to bring up a bigger keyboard. See [Touchscreen keyboards](#) for more details.

**Note:** To activate auto-rotate mode, swipe up from Home screen to access **Apps**, and tap **Settings**  > **Display** > **Auto-rotate screen**, and slide the switch to the **On**  position. You can also activate it by dragging down status bar and tap **Auto-rotate** .

### ***Pinch and spread***

“Pinch” the screen using your thumb and forefinger to zoom out or “spread” the screen to zoom in when viewing a picture or a Web page. (Move fingers inward to zoom out and outward to zoom in.)

## ***Activation and service***

Before using your phone, you must set up your service.

1. Press and hold the **Power** button to turn your phone on. Allow hands-free activation to connect the phone to the network and then allow the phone to check for any updates. The phone will then power off.
2. After the phone turns back on, the device may ask you to complete a few setup screens to customize your phone. You may need to skip the setup screens and complete step 3 first.
3. From home screen, tap **Phone**  and **Dialer pad** . Dial 611, tap **Call**  and then follow the recorded directions.

## ***Complete the setup screens***

Once your service has been activated, you will need to run Setup. The Setup Wizard will appear to guide you through the basic settings on your device.

Select a default language you want to use, select your Internet connection, enter your name to personalize some apps, set screen lock method, sign in to your Google™ Account, select location services, and more.

Follow the remaining instructions to finish your phone setup.

# Basic operations

The following topics outline basic features and operations of your phone.

## Home screen and applications (Apps) list

Most of your phone's operations originate from the home screen or the apps list.

1. From any screen press the **Home** button  to display the home screen.
2. From home, swipe up to access **Apps**.

For information about using the home screen, see [Home screen basics](#).

## Select options and navigate screens

Tap icons, onscreen buttons, and other items to open or activate the assigned function.

- Tap **Back** button  to return to the previous screen.

## Recent applications

You can display a list of recently used applications using the **Recent Apps** button .

- Tap **Recent Apps** button  to view a list of recently used applications.

For more information, see [Switch between recently opened apps](#).

## *Phone settings menu*

You can customize your phone's settings and options through the Settings menu.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Or you can also drag the status bar down twice and tap **Settings** .

For more information, see [Basic settings](#).

## Portrait and landscape screen orientation

The default orientation for your phone's screen is portrait (vertical), but many apps will change to landscape orientation (widescreen) when you rotate the phone sideways.

**Note:** Not all screens will adjust for landscape orientation.

### Turn screen rotation on or off

1. Drag the status bar down. Tap **Auto-rotation**  to turn the option on or off.
2. You can also set the rotation option from the Settings menu.

From home, swipe up to access **Apps**, tap **Settings** , and tap **Display > Auto-rotate screen**, and slide the switch to the **On**  or **Off**  position to activate or deactivate it.

### Capture screenshots

To capture a screenshot, you can follow either of the following two ways:

- Press and hold the **Power** key and **Volume down** key at the same time to capture a screenshot of the current screen.
- Touch and hold the **Power** key from the screen you want to capture a screenshot, and tap **Screenshot**.

The screenshots you've taken will be stored in the Screenshots album in the phone's **Photos**

app. From home, swipe up to access **Apps**, and tap **Photos** .

# Applications

The following topics describe how to access the applications (apps) list and launch apps on your phone.

## Launch applications

All installed apps can be accessed and launched from the apps list.

1. From home, swipe up to access **Apps**.

2. Tap an app icon to launch the corresponding application.

## Working with apps

### Group apps into a folder

1. Touch and hold an app and drag it over to another app to create a folder automatically.
2. To add more apps to the folder, drag each app over to the folder.
3. To name or rename the folder, open the folder, tap the title bar, and then enter a folder name.

### ***Remove apps from a folder***

1. Tap the folder to open it.
2. Touch and hold an app in the folder and drag it out to the Home screen.

### ***App shortcuts***

Touch and hold an app icon on the Home screen or the Apps screen to display a menu that lets you quickly access common app functions.

**Note:** Not all apps support the app shortcuts feature.

### ***Switch between recently opened apps***

You can easily switch between the apps you've recently opened.

Tap **Recent Apps** button  to see your recently-opened apps.

1. To locate an app, swipe right or left through the cards to find the app and tap it.
2. To remove an app, slide it up.
3. To remove all of the apps, slide the screen to the left side and tap **CLEAR ALL**.

You can tap **Recent Apps** button  twice to quickly switch between two most recently used apps.

### ***Control app permissions***

The first time you open an app, you'll be asked to grant permission to access certain data or features. This makes sure that you have full control of which apps have authorized access.

If you don't want to grant access for one app, you can choose **Deny**. If you choose **Deny** in a trusted app, you may not be able to use the app or access all the functions. To modify permission settings, you can follow the below steps:

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications > App permissions**.
3. Tap the app you want to modify permissions, and slide the switch to **On**  or **Off**  position to adjust the permission settings.
4. You can also access permission settings by touching and hold the app on Home screen or Apps screen, tap  to access App info screen, and tap **Permissions**.

### ***Set default apps***

You can choose default apps for web browsing, text messaging, and more.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications > Default apps**.

3. Choose your default web browser, phone, messages, and more.

### **Set up app links**

When you tap a link, there may be more than one app that can open it, and you'll need to choose the app you want to use on the prompted screen. You can also tap **Always** on the prompt screen to set that app as the default to use.

You can also set different apps as default one to open the link by Settings menu.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications > Default apps > Opening links**.
3. Tap the app you want to set and tap **Open supported links**.
4. Choose **Open in this app** to set this app as default one to open when you tap a link. You can also choose **Ask every time** or **Don't open in this app** according to your preference.

### **Disable an app**

You can disable some default apps which can't be uninstalled to avoid them running in the background and downloading data.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications**.
3. Tap the app you want to disable to access App info screen.
4. Tap **Disable**.

**Tip:** You can also touch and hold an app on Home screen or Apps screen, tap  to access App info screen, and tap **Disable**.

### **Apps list**

The apps list expands to include any apps you download and install on your phone. The following table outlines the primary apps that have been preinstalled on your phone.

<b>App</b>	<b>Function/Service</b>
 <b>Amazon</b>	Online shopping from the earth's biggest selection of books, music, electronics, computers, software, apparel & accessories, shoes and more.
 <b>Amazon Prime Video</b>	Watch TV shows and movies including award-winning Amazon exclusives.
 <b>Calculator</b>	Perform basic and advanced mathematical calculations.

App	Function/Service
 <b>Calendar</b>	Create and manage events, meetings, and appointments, organize your time and remind you of important events.
 <b>Caller ID</b>	Subscribe to Premium Caller ID to detect & block spam, identify unknown callers/texters, get detailed alerts and much more.
 <b>Camera</b>	Take and share pictures and videos.
 <b>Chrome</b>	A browser you can use to surf the Internet.
 <b>Clock</b>	Set alarms, view time in time zones around the world, use a stopwatch, set a timer, and use your phone as a desk clock.
 <b>Contacts</b>	Manage your contacts from a variety of sources.
 <b>Drive</b>	Allows users to store files on Google servers, synchronize files across devices, and share files.
 <b>Duo</b>	Lets users make video calls in high definition.
 <b>Facebook</b>	Connect with friends, family and other people you know. Share photos and videos, send messages and get updates.
 <b>Files</b>	Check the category of documents, pictures, videos and downloads.
 <b>FM Radio</b>	Insert an earphone to listen to Radio channels.
 <b>Gmail</b>	Send, receive, and manage your Gmail messages.
 <b>Google</b>	Search information saved on the phone and in phone applications as well as on the Internet.
 <b>Keep</b>	Add notes, lists, photos and audio to Keep.
 <b>Maps</b>	Determine your location, find directions, browse local businesses and attractions, rate and review places, and more.
 <b>Messages</b>	Send and receive text messages.
 <b>Phone</b>	Place and receive calls, use voicemail, set up and manage contacts, and more.
 <b>Photos</b>	Manages your photos including backing up and searching.

 <b>Play Movies &amp; TV</b>	Buy or rent movies and TV shows, and watch them on your TV, smartphone, tablet, etc.
 <b>Play Music</b>	Let you browse, shop, and play back songs purchased from Google Play.
 <b>Play Store</b>	Provide new Android apps, books, movies, and music for your phone.
 <b>Settings</b>	Provide an overview of items you can change through Settings.
 <b>Sound Recorder</b>	Record sounds and play them back.
 <b>Voice mail</b>	Lets you listen to and view messages in any order, as well as easily manage your inbox without ever having to call into your voicemail.
 <b>Wireless Emergency</b>	Receive and manage incoming Wireless Emergency alerts.
 <b>YouTube</b>	Video-sharing website allows you to watch videos, upload videos, etc.

## *Phone number*

Follow the instructions below to display your phone's wireless phone number.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > About phone > SIM status**.
3. You will see the phone number listed under **Phone number on SIM**.

## *Airplane mode*

Airplane mode turns off all functions that emit or receive signals, while leaving your phone on so you can use apps that don't require a signal or data.

### *To turn on airplane mode*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Airplane mode**.
3. Slide the switch to the **On**  position to activate the airplane mode.

You will see the airplane mode icon  on the status bar.

## To turn off airplane mode

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Airplane mode**.
3. Slide the switch to the **Off**  position to deactivate the airplane mode.

Your phone's wireless connection features are now restored.

**Tip:** You can also access airplane mode through the status bar menu. Drag the status bar down twice to access Quick Settings Panel and tap **Airplane mode**  to have it enabled or disabled.

**Note:** Airplane mode may not be displayed on the first screen of the Quick Settings Panel, you need to slide to the right to the next screen to locate it.

## Enter text

You can type on your phone using one of the available touchscreen keyboards or Google voice typing.

### Touchscreen keyboards

Your phone offers you a choice of Google touchscreen keyboards for entering text. The keyboard appears automatically onscreen when you tap a text entry field, and they can be used in either portrait or landscape mode. You can also use the Google Voice typing option to enter text using your voice (see [Google voice typing](#) for details).

**Note:** Keyboard layouts and options may change depending on where you're using them. For example, if you're entering text to do a Web search, a search icon may be available instead of an enter key.

## Google keyboard

The Google keyboard offers a traditional QWERTY keyboard setup for entering text by tapping keys (like on a computer), along with enhancements and options that allow you to enter text faster and more accurately, such as continuous key input, personalized usage dictionaries, and more.

### Use Google keyboard

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Language & input > Virtual keyboard > Gboard**.

## Google voice typing

Google voice typing uses Google voice recognition to convert speech to text.

## Tips for editing text

Your phone gives you many options to make entering text easier, including copying, cutting, and pasting text, using voice-to-text input, customizing the user dictionary, using predictive text, and more.

To edit text you have already entered:

1. Touch and hold or double-tap within the text you would like to edit.
2. Drag the tabs to change the highlighted selection.
3. The following options will appear: **Select all**, **Cut**, **Copy**, **Share** and **Paste** (only after the Copy action).

To insert new text:

1. Touch where you want to type, or touch and hold a blank space, the cursor will blink and the tabs will show. Drag the tab to move the cursor.
2. If you have selected any text, tap the tab to show **Paste** which allows you to paste any text you have previously copied.

## *Google Account*

You will need a Google Account to access several phone features such as Gmail, Google Maps, Duo, and the Google Play applications. Before you are able to access Google applications, you must enter your account information. These applications sync between your phone and your online Google Account.

### **Google Account cautions**

Be sure not to forget your Google Account ID or password.

### *Create a Google Account*

If you do not already have a Google Account, you can create one online or using your phone.

**Note:** You can also create and sign into your Google/Gmail account through your phone's Settings application.

#### ***Create a Google Account online***

1. From a computer, launch a Web browser and navigate to [google.com](http://google.com).
2. On the main page, click **Sign-in > Create an account**.
3. Follow the onscreen prompts to create your free account.
4. Look for an email from Google in the email box you provided and respond to the email to confirm and activate your new account.

## Create a Google Account using your phone

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accounts > Add account**.
3. Tap **Google** and then tap **Or create a new account**.

4. Follow the prompts to set up your account. Tap **Next** to proceed between steps, which may include:
  - Enter your **First name** and **Last name**.
  - Enter a desired **Username**.
  - Enter and reenter a password.
  - Create a security question and answer, enter a secondary email address to help you recover your password if you ever lose it.
  - On the Finish account screen, select your Web history and additional Google Play options.
  - Enter the letters from the Authenticating screen.
  - After your phone connects with the Google servers, select the items you would like to sync with your phone and then tap **Sync now**.
5. Tap **Finish setup**.

**Note:** When setting up a new Google Account, either on your phone or online, you will be prompted to add a secondary email address. Enter a second Gmail address or any other email address from which you currently send and receive email. This address is used to authenticate your account should you ever encounter problems or forget your password. It is strongly encouraged for Android users so you can regain access to Google services and purchases on your phone.

## Sign in to your Google Account

If you have a Google Account but have not yet signed in with your phone, follow these instructions to sign in to your Google Account.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accounts > Add account**.
3. Tap **Google**, and then tap **Enter your email**.
4. Enter your Gmail address and password, and then tap **Next**.
5. After your phone connects with the Google servers, select the items you would like to sync with your phone and then tap **Sync now**.

6. Tap **Finish setup**.

## Google Play Store

Google Play™ is the place to go to find new Android™ apps, books, movies, and music for your phone. Choose from a wide variety of free and paid content ranging from productivity apps and games to bestselling books and blockbuster movies and music. When you find what you want, you can easily download and install it on your phone.

To access the Google Play store app, you must first connect to the Internet using your phone's Wi-Fi or mobile data connection and sign in to your Google Account. See [Sign in to your Google account](#) for details.

### Installing applications

Many different kinds of applications can be installed on your phone from Google Play (provided by Google Inc.). Wiko is not responsible in any way for user-installed applications (quality, reliability, legality, fitness for a purpose, credibility, accuracy, etc.) or resulting malfunctions (viruses, etc.).

**Important:** Our policies often do not apply to third-party applications. Third-party applications may access your personal information or require us to disclose your customer information to the third-party application provider. To find out how a third-party application will collect, access, use, or disclose your personal information, check the application provider's policies, which can usually be found on their website. If you aren't comfortable with the third-party application's policies, don't use the application.

## *Find and install an app*

When you install apps from Google Play app and use them on your phone, they may require access to your personal information (such as your location, contact data, and more) or access to certain functions or settings of your phone. Download and install only apps that you trust.

1. From home, swipe up to access **Apps**, and tap **Play Store** .
2. When you open the Google Play store app for the first time, the Terms of Service window will appear. Tap **Accept** to continue.
3. Browse through the categories (**Apps**, **Games**, **Movies & TV**, **Music**, **Books**, or **Newsstand**), find an item you're interested in, and tap the name.

- Browse through featured apps. Scroll through the list of featured apps when you open Google Play.
  - Search for an app. Tap in the search bar at the top of the Google Play home screen, enter the name or type of app you're looking for, and then tap  on the keyboard.
4. Tap an app to read a description about the app and user reviews.
  5. Tap **Install** (for free applications) or the price (for paid applications).

**Note:** If you have not already done so, you will need to set up a payment method to purchase paid apps from Google Play.

6. The subsequent screen notifies you whether the app will require access to your personal information or access to certain functions or settings of your phone. If you agree to the conditions, tap **ACCEPT** (for free apps) or **ACCEPT** and then **BUY** (for paid apps) to begin downloading and installing the app.
  - If you have not already set up a payment method, tap **CONTINUE** and then follow the prompts to arrange payment and complete the purchase.

The selected app is downloaded and installed on your phone.

**Warning: Read the notification carefully!** Be especially cautious with applications that have access to many functions or a significant amount of your data. Once you tap **OK** on this screen, you are responsible for the results of using this item on your phone.

### **Purchasing applications**

Purchase apps at your own risk. Wiko is not responsible for any harm to you or third parties resulting from the use of purchased applications.

### *Request a refund for a paid app*

If you are not satisfied with an app, you can ask for a refund within 15 minutes of the purchase. Your credit card is not charged and the app is uninstalled from your phone.

If you change your mind, you can install the app again, but you can't request a refund a second time.

1. From home, swipe up to access **Apps**, and tap **Play Store** .
2. Tap **Menu**  > **My apps & games**.
3. Tap the app to uninstall for a refund. The details screen for the app opens.
4. Tap **Refund**, and then tap **Yes** to confirm. Your app is uninstalled and the charge is canceled.

### *Update an app*

Depending on your settings, many apps will update automatically, or you can update apps directly from the Play Store app.

#### **Update an App Directly**

1. From home, swipe up to access **Apps**, and tap **Play Store** .
2. Tap **Menu**  > **My apps & games**.

3. Tap the app you want to update, and then tap **Update** > **Accept**.

The app update is downloaded and installed.

### ***Set Automatic App Updates***

1. From home, swipe up to access **Apps**, and tap **Play Store** .
2. Tap **Menu**  > **Settings**.
3. Tap the app you want to set for auto-update, and then tap **Auto-update**.

The app is set to update automatically whenever an update becomes available.

**Note:** Automatic updates are unavailable for some apps.

### ***Uninstall an app***

You can uninstall any app that you have downloaded and installed from Google Play.

1. From home, swipe up to access **Apps**, and tap **Play Store** .
2. Tap **Menu**  > **My apps & games**.

3. On the Installed screen, tap the app you want to uninstall, and then tap **UNINSTALL > OK**.  
The app is uninstalled and removed from your phone.

### *Get help with Google Play*

The Google Play store app offers an online help option if you have questions or wants to know more about the app.

1. From home, swipe up to access **Apps**, and tap **Play Store** .
2. Tap **Menu**  > **Help & Feedback**.

The Web browser will take you to the Google Play Help Web page, where you will find comprehensive, categorized information about Google Play.

## *Lock and unlock your screen*

Your phone allows you to quickly turn the screen off when not in use and to turn it back on and unlock it when you need it.

### ***Turn the screen off when not in use***

To quickly turn the screen off, press the **Power** key. Pressing the **Power** key again or receiving an incoming call will turn on your phone screen and show the lock screen.

To save battery power, the phone automatically turns off the screen after a certain period of time when you leave it idle. You will still be able to receive messages and calls while the phone's screen is off.

**Note:** For information on how to adjust the time before the screen turns off, see [Display settings](#).

### ***Turn the screen on and unlock it***

1. To turn the screen on, press the **Power** key.
2. Swipe your finger across the screen from bottom to top to unlock it.

If you have set up a screen lock, you will be prompted to draw the pattern or enter the password or PIN. See [Screen lock](#) for details.

## *Update your phone*

From time to time, updates may become available for your phone. You can download and apply updates through the **Settings > System > System updates** menu.

### **Software update cautions**

**Update Size:** Any update larger than 100MB will require you to connect to Wi-Fi as the update cannot be downloaded over the cellular network.

**During update:** The phone cannot be used until the software update is complete. It may take time to update your phone's software.

**Signal during update:** Update your phone where signal reception is good, and do not change location during the update process. Make sure the battery is adequately charged before beginning an update. A weak signal or low battery during an update may cause the update to fail. An update failure may disable the phone.

**Other functions during update:** Other phone functions cannot be used during a software update.

## *Update your phone software*

You can update your phone's software using the System update option.

### ***Before updating your phone***

Updating your phone may result in a loss of saved data depending on the condition of your phone (malfunctioning, damaged, water seepage, etc.). You must back up all critical information before updating your phone firmware.

### ***Back up all data prior to update***

To back up your Gmail information:

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accounts > Google**.
3. Tap **Account sync**.
  - If the Account sync option is already on, the switch will be to the right in the on position.
  - If the Account sync option is off, slide the switch to the right so it is in the on position.

To back up your Exchange Mail information:

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accounts > Exchange > Sync now**.
3. Tap the sync icon within the corporate account field to reveal the account's synchronization settings screen.
4. Toggle the onscreen checkmark to manually synchronize the desired parameters (Contacts or Calendar).

To back up stored text messages:

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Select the text message from the list to view the message thread.
3. Touch and hold on a portion of the text message from the string. The Message options context menu appears.

**Note:** You can back up stored text messages by forwarding them to your own phone number. Open the messages after you have updated your firmware.

4. Tap **Forward**.
5. Enter your phone number and tap **Send**.

To restore your Google apps following the update:

1. From home, swipe up to access **Apps**, and tap **Play Store** .

2. Tap **Menu**  > **My apps & games** > **Library** tab.
3. Scroll through the list of previously downloaded Google apps and choose those you wish to reinstall.
4. Follow the onscreen instructions.

**Note:** Your Google app purchases are reloaded remotely and can be re-installed after the update is applied.

As an added precaution, to preserve any data on your microSD card, please unmount it from your phone prior to starting the update process. From home, swipe up to access **Apps**, and tap **Settings**  > **Storage**, and tap  to eject the SD card.

### ***Update your phone's software***

Once you have backed up all your data, use the **Update now** option to update your phone's software.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System** > **Advanced** > **System updates** > **System update** > **Check for update**.
3. Tap .

Your phone automatically downloads and installs any available updates. You may be required to power your phone off and back on to complete the software upgrade.

Alternatively, you can access system updates through the notification panel.

1. Drag the status bar down.
2. Locate the **System update available** icon () in notifications.
3. Tap  to open the **System updates** screen.
4. Tap **Download** and follow the onscreen instructions.

The downloading icon  appears within the status bar to indicate the phone is downloading the necessary files.

5. Tap **Restart** and install to complete the process.

### ***Confirm your current phone software***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System** > **About phone**.
3. Locate the **Software version** on the screen displayed.

## *Update your profile*

This option allows you to automatically update your online user profile information. If you choose to change your user name and select a new one online, you must then update the user name on your phone.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System** > **System updates** > **Update profile**.

3. Follow the onscreen instructions.

The phone will download and install the profile update and you will see a confirmation when complete.

**Note:** If your data services or account syncing ever seems to go out unexpectedly, use this [feature to reconnect with the network](#).

## *Update your PRL*

This option allows you to download and update the PRL (preferred roaming list) automatically.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System** > **System updates** > **Update PRL**.

3. Follow the onscreen instructions.

The phone will download and install the PRL update and you will see a confirmation when complete.

# Your phone's home screen

The following topics describe how to use and customize your phone's home screen, understand the status bar, and use the notification panel.

## Home screen basics

The home screen is the starting point for your phone's applications, functions, and menus. You can customize your home screen by adding application icons, shortcuts, folders, widgets, and more.

## Home screen layout

Your home screen extends beyond the initial screen. Slide the screen left or right to display additional screens.

Item	Description
<b>Status bar</b>	Displays icons to notify you of your phone's status (on the right side) and notifications (on the left side).
<b>Notification area</b>	Displays notifications for incoming messages, missed calls, application updates, and more. Drag the status bar down to display the notification panel.
<b>Status area</b>	Displays phone and service status information such as signal strength, battery status, Wi-Fi and data connectivity, ringer status, and time.
<b>Widget</b>	Widgets are self-contained onscreen apps that reside on your phone's home screen.
<b>Application icons</b>	Application icons are shortcuts to favorite applications. You can add and remove these shortcuts as you wish.
<b>Primary shortcuts</b>	Primary shortcuts are application shortcuts that appear in the same location on all of your phone's home screens. These are customizable except for the Applications (Apps) shortcut, which remains static.
<b>Recent Apps button</b> 	Tap to display a list of recently used applications.
<b>Home button</b> 	Tap to display the main home screen.
<b>Back button</b> 	Tap to return to the previous screen.

**Note:** Your phone's home screens cycle through so that you can keep swiping in one direction and make it back to the main home screen. The small circles above the primary shortcuts let you know your current screen position.

**Tip:** Press **Home button**  to return to the main home screen from any other screen.

### *Extended home screens*

In addition to the main home screen, your phone features extended home screen to provide more space for adding icons, widgets, and more. Press **Home button**  to display the main home screen and then slide the screen right to move from the main screen to an extended screen.

To add a new home screen, drag an app or a widget icon to the right edge of the main screen, and release the icon till a new home screen is displayed.

- While on an extended screen, press **Home** button  to return to the main home screen.

## *Status bar and notification panel*

Your phone's status and notifications are available at a glance at the top of the screen.

### *Status bar*

The status bar at the top of the home screen provides phone and service status information on the right side and notification alerts on the left. To view the notification panel or access the quick settings menu, drag the status bar down from the top of the screen.

#### **Main status icons**

Icon	Status
	Bluetooth <sup>®</sup> active
	GPS active
	Wi-Fi <sup>®</sup> active
	Downloading
	Vibrate
	Speakerphone active
	Network (full signal)
	Network (roaming)

	4G LTE data service
	3G data service
	Airplane mode
	Sync active
	Alarm set
	Battery (charging)
	Battery (full charge)

**Main notification icons**

Icon	Notification
	Missed call
	New voicemail
	New Gmail
	New text or MMS message
	Event
	USB connection
	Alarm
	Warning
	Update available
	Update downloading
	Update successful
	Keyboard active

**Note:** Additional notification icons may appear. All notifications may be accessed through the notification panel.

## *Notification panel*

Your phone's notifications appear at the left side of the status bar, and you can access the full notification panel by dragging down the status bar. From there, you can check notifications, download updates, open messaging apps, use the quick settings menu, and more.

### *Open the notification panel*

- Drag the status bar down.

The notification panel opens. To check notifications, tap an item in the list.

### *Close the notification panel*

- Swipe up the notification panel to close the notification panel.
- Or you can also tap **Back** button ◀ to close it.

### *Notification panel layout*

The notification panel gives you access to both notifications and the Quick Settings menu.

To access the Quick Settings menu:

1. Drag the Status bar down to display Notification Panel.
2. Drag the Status bar down again to access full Quick Settings menu.

## *Customize the home screen*

Learn how to set the wallpaper and add, move, or remove shortcuts, widgets, and folders from the home screen.

### ***Operations for rearranging the home screen***

- **Moving widgets and icons:**

From home, touch and hold an item and then drag it to the desired location.

- **Deleting widgets and icons:**

From home, touch and hold an item and then drag it up to **Remove**.

- **Displaying the home screen menu:**

From home, touch and hold an empty space to display the home screen menu. It includes Wallpapers, Widgets, and Home settings

## *Change the wallpaper*

Select and assign your phone's background wallpaper.

1. From home, touch and hold an empty space, and tap **Wallpapers**.

- You can also access the wallpaper menu through settings. From home, swipe up to access **Apps**, and tap **Settings**  > **Display** > **Wallpaper**.
2. Tap a location to select the wallpaper from.
  3. Select a picture and tap **Set wallpaper**.
  4. You can set this picture as the wallpaper of Home screen, Lock screen, or both Home screen and lock screen.

### *Add shortcuts to the home screen*

You can add shortcuts for quick access to favorite apps from the home screen.

1. From home, swipe up to access **Apps**.
2. Touch and hold an app icon and drag it to move. The icon will disengage and you will see thumbnails of your home screens.
3. Drag the icon to an empty location on one of the home screens. The shortcut is added to the home screen.

### *Add widgets to the home screen*

You can add widgets to your phone's home screen. Widgets are self-contained apps that display on a home screen. Unlike a shortcut, the Widget works like as an onscreen application. There are all kinds of widgets, including links to a specific contact, Internet bookmarks, Calendar, Gmail and email accounts, and many others.

1. From home, touch and hold an empty space, and then tap **Widgets**.

2. Touch and hold a widget icon. The icon will disengage and you will see thumbnails of your home screens.
3. Drag the icon to an empty location on one of the home screens. The widget is added to the home screen.

### *Add folders to the home screen*

You can group home screen shortcuts into folders for convenient access.

1. Drag a shortcut and release it over another shortcut on the Home screen to create a folder.

2. Type a name for the folder, and then tap .

3. To add more app shortcuts to the folder, touch and hold a shortcut and drag it on top of the new folder.

### ***Change folder names***

Once you have added folders, you can change the name easily from the folder display.

1. From home, tap the folder to open it, and then tap the folder name.
2. Type a new name and then tap .

# ***Making connections***

---

The topics in this section will cover your phone's ability to help you make connections, from phone calls and maintaining contacts, to text messages, email, Internet, and international services.

# Phone calls and voicemail

The following topics outline the use of your device's phone app to place and receive calls, use voicemail, and more.

## Place and answer calls

The following topics describe how to directly dial calls, how to answer incoming calls, and how to use the in-call screen options.

### Adjust In-Call volume

Press the **Volume** key up or down during the call.

### Emergency call cautions

Emergency calls are restricted in Airplane mode.

## Call using the phone dialer

The most “traditional” way to place a call is by using the phone's dialer screen.

1. From home, tap **Phone** .
2. To dial a new number, tap **Keypad**  to display the dialer screen.
3. Enter the numbers on the keypad.

As you enter digits, Smart Dial searches for contacts that match. If you see the number you want to dial, tap it to place the call immediately without entering the rest of the number.

4. Tap  to call the number.

The call begins when the other party answers.

5. To end the call, tap .

### *Call emergency numbers*

You can place calls to 9-1-1 even if the phone's screen is locked or your account is restricted.

To call the 9-1-1 emergency number when the phone's screen is locked with a screen lock:

1. From the lock screen, tap **Emergency call**.
2. Tap .

As long as you are in an area covered by wireless service, the emergency call is placed.

To call the 9-1-1 emergency number normally or when your account is restricted:

1. Unlock the screen. For more information, see [Lock and unlock your screen](#).
2. From home, tap **Phone**  > **Keypad** .
3. Tap .

As long as you are in an area covered by wireless service, the emergency call is placed.

### ***Enhanced 9-1-1 (E 9-1-1) information***

This phone features an embedded Global Positioning System (GPS) chip necessary for utilizing E 9-1-1 emergency location services where available.

When you place an emergency 9-1-1 call, the GPS feature of your phone seeks information to calculate your approximate location. Depending on several variables, including availability and

access to satellite signals, it may take up to 30 seconds or more to determine and report your approximate location.

**Important:** Always report your location to the 9-1-1 operator when placing an emergency call. Some designated emergency call takers, known as Public Safety Answering Points (PSAPs), may not be equipped to receive GPS location information from your phone.

## *Answer phone calls*

The following information lets you know how to answer incoming calls, mute the ringer on incoming calls, reject incoming calls, and more.

When you receive a phone call from a contact, the Incoming call screen appears and displays the caller ID icon, name, and phone number of the calling party. When you receive a phone call from someone who is not stored in People, only the default caller ID icon and phone number appear on the Incoming call screen.

**Note:** If your phone is turned off, all calls automatically go to voicemail.

### ***Answer an incoming call***

1. When a call arrives, swipe the  up to answer it.

2. To end the call, tap .

### ***Mute the ringing sound***

To mute the ringer without rejecting the call, you can do either of the following:

1. Press the **Volume** down key.
2. Place the phone face down on a level surface.

### ***Reject an incoming call***

1. When a call arrives, swipe the  down to reject it.

2. The ringtone or vibration will stop and the call will be sent directly to voicemail.

### ***Reject a call and send a text message***

You can reject an incoming call and automatically send a text message to the caller.

1. When a call arrives, tap  from the bottom left corner of the screen.

The ringtone or vibration will stop and you will see a list of preset text messages.

2. Tap one of the messages to send it to the caller.

You can edit the reject messages through the call settings menu. From the phone app, tap **Menu**  > **Settings** > **Quick responses** and edit or create the reject messages.

### *In-call screen layout and operations*

While you're on a call, you will see a number of onscreen options.

#### ***In-call screen layout***

Tap options to activate them during a call.

Item	Description
 <b>Speaker</b>	Route the phone's audio through the speaker (On) or through the earpiece (Off). <ul style="list-style-type: none"> <li>• Activate <b>Speaker</b> to route the phone's audio through the speaker.</li> <li>• Deactivate <b>Speaker</b> to use the phone's earpiece.</li> </ul> <p><b>Warning:</b> Because of higher volume levels, do not place the phone near your ear during speakerphone use.</p>
 <b>Mute</b>	Mute the microphone during an active call. Tap again to unmute the microphone.
 <b>Keypad/Hide</b>	Toggle the appearance of the onscreen keypad. Show the keypad to enter additional numbers, for example, an extension or access code.
 <b>On hold</b>	Tap to hold the current call.
 <b>Add call</b>	Tap to initiate a conference call (3-way call)
 <b>End call</b>	End the current call.
 <b>Start recording</b>	Record the current call.
 <b>Merge</b>	Join two currently active calls (conference).
 <b>Swap</b>	Swap the calls.
 <b>Bluetooth</b>	Route the phone's audio through a connected Bluetooth headset (On) or through the speaker (Off). <ul style="list-style-type: none"> <li>• When the call is routed to a Bluetooth headset, the current call area shows the Bluetooth call icon (  ).</li> </ul> <p><b>Note:</b> The Headset button is activated to show the current call is routed to the connected Bluetooth headset.</p> <ul style="list-style-type: none"> <li>• To route the current call back to the phone, tap <b>Headset</b> to temporarily use the phone. Tap it again to route the call back to the connected Bluetooth headset.</li> <li>• When Bluetooth or the Bluetooth headset is turned off, the call is routed through either the earpiece or speaker and shows (  ).</li> </ul>

## *Place a call from Contacts*

You can place phone calls directly from entries in your Contacts list.

1. From home, tap **Phone** .
2. Tap **Contacts**  to display the Contacts list.

3. Tap a contact.
4. Tap **Call**  next to the number you want to call. The call begins when the other party answers.
5. To end the call, tap .

## *Call from call log*

The call log list lets you quickly place calls to recent incoming, outgoing, or missed numbers.

1. From home, tap **Phone** .
2. Tap **Call log**  to display the call log list.

3. Tap **Call**  to the right side of the entry you want to call.  
You can tap a contact in call history to display more options.

- **Send a message:** to send a message to the contact/number.
- **Block number:** to block this contact/number.
- **Call details:** to view detailed call information.

The call begins when the other party answers.

4. To end the call, tap .

# Voicemail

The following topics describe how to set up and use your phone's voicemail and visual voicemail features.

## Voicemail setup

Follow the instructions below to set up voicemail on your phone. You should set up your voicemail and personal greeting as soon as your phone is activated. Always use a passcode to protect against unauthorized access. Your phone automatically transfers all unanswered calls to your voicemail, even if your phone is in use or turned off.

1. From home, tap **Phone**  > **Keypad** .
2. Touch and hold  to dial your voicemail number.

3. Follow the system prompts to:
  - Create your passcode.
  - Record your name announcement.
  - Record your greeting.

**Important: Voicemail passcode** – It is strongly recommended that you create a passcode when setting up your voicemail to protect against unauthorized access. Without a passcode, anyone who has access to your phone is able to access your voicemail messages.

## Optional calling services

The following topics outline additional voice-related services available with your phone, including call services and more.

### Caller ID blocking

Caller ID identifies a caller before you answer the phone by displaying the number of the incoming call. If you do not want your number displayed when you make a call, follow these steps.

1. From home, tap **Phone**  > .
2. Tap  **67** .
3. Enter a phone number.
4. Tap .

Your caller information will not appear on the recipient's phone.

To permanently block your number, call Wiko Customer Service.

### Call waiting

When you're on a call, Call Waiting alerts you to incoming calls by sounding two beeps. Your phone's screen informs you that another call is coming in and displays the caller's phone number (if it is available).

To respond to an incoming call while you're on a call:

- Swipe the  up. (This puts the first caller on hold and answers the second call.)

To switch back to the first caller:

- Tap **On hold**.

**Note:** For those calls that you don't want to be interrupted, you can temporarily disable Call waiting by pressing \*70 before placing your call. Call waiting is automatically reactivated once you end the call.

## Conference calling

With conference calling, also known as 3-way calling, you can talk to two people at the same time. When using this feature, the normal airtime rates will be charged for each of the two calls.

1. On the Phone screen, enter a number and tap  (or place a call from Log or Contacts).
2. Once you have established the connection, tap , and dial the second number (or place the call from Log or Contacts).

This puts the first caller on hold and dials the second number.

3. When you're connected to the second party, tap . Your conference call is now in session.
4. To end the three-way call, tap .

**Note:** If one of the people you called hangs up during your call, you and the remaining caller stay connected. If you initiated the call and are the first to hang up, all callers are disconnected.

## Call forwarding

Call Forwarding lets you forward all your incoming calls to another phone number – even when your phone is turned off. You can continue to make calls from your phone when you have activated Call Forwarding.

**Note:** You are charged a higher rate for calls you have forwarded.

To activate Call Forwarding:

1. From home, tap **Phone**  > .
2. Tap  **72**  FGRS ABC.
3. Enter the area code and phone number to which you want your calls forwarded.
4. Tap .

You will hear a tone to confirm the activation of Call Forwarding. All calls to your wireless number will be forwarded to the designated phone number.

To deactivate Call Forwarding:

1. From home, tap **Phone**  > .
2. Tap  **720**  FGRS ABC.
3. Tap .

You will hear a tone to confirm the deactivation.

## *Call settings*

Your phone's settings menu lets you configure your voicemail options and a number of other settings for the phone application.

### *Call settings options*

1. From home, swipe up to access **Apps**, and tap **Phone** .
2. Tap **Menu**  > **Settings**.
3. Configure your options.
  - Tap a menu item to display its options.
  - Select your options and follow the prompts to set them.

Use the Settings menu to adjust the following settings:

Setting	Description
<b>Display options</b>	Tap to set all display name and order.
<b>Sounds and vibration</b>	Tap to set all ringtone, enable or disable vibration and keypad tones.
<b>Quick response</b>	Tap to view messages for quick response.
<b>Calls</b>	Tap to set call forwarding and call waiting, enable or disable enhanced privacy mode.
<b>Blocked numbers</b>	Tap to add blocking numbers.
<b>Voicemail</b>	Tap to set up voicemail.
<b>Accessibility</b>	Tap to set TTY mode, enable or disable Hearing aids and Noise reduction mode.
<b>About</b>	Tap to know more about the build version, licenses, privacy policy, and terms of service.

### **TTY mode**

A TTY (teletypewriter, also known as a TDD or Text Telephone) is a telecommunications device that allows people who are deaf, hard of hearing, or who have speech or language disabilities, to communicate by telephone.

Your phone is compatible with select TTY devices. Please check with the manufacturer of your TTY device to ensure that it supports digital wireless transmission. Your phone and TTY device will connect using a special cable that plugs into your phone's headset jack. If this cable was not provided with your TTY device, contact your TTY device manufacturer to purchase the connector cable.

To turn TTY Mode on or off:

1. From home, tap **Phone**  > **Menu**  > **Settings** > **Accessibility** > **TTY mode**.

2. Tap **TTY Full**, **TTY HCO**, or **TTY VCO** to turn TTY mode on.

Tap **TTY Off** to turn TTY mode off.

**Note:** When enabled, TTY mode may impair the audio quality of non-TTY devices connected to the headset jack.

**Warning: 9-1-1 emergency calling**

It is recommended that TTY users make emergency calls by other means, including Telecommunications Relay Services (TRS), analog cellular, and landline communications. Wireless TTY calls to 9-1-1 may be corrupted when received by public safety answering points (PSAPs), rendering some communications unintelligible. The problem encountered appears related to TTY equipment or software used by PSAPs. This matter has been brought to the attention of the FCC, and the wireless industry and the PSAP community are currently working to resolve this.

# Contacts

The Contacts application lets you store and manage contacts from a variety of sources, including contacts you enter and save directly in your phone as well as contacts synchronized with your Google Account, your PC, compatible email programs (including Exchange Server), and your Facebook friends.

## Contacts cautions

Information saved in Contacts may be lost or changed if the battery is removed for a long period or left uncharged. Accident or malfunction may also cause loss or change to information. It is recommended that you keep a separate copy of contacts and other important information. Wiko is not responsible for any damages from lost or changed contacts.

## Add a contact

You can add contacts from your phone's Phone application. Enter details such as name, phone numbers, email addresses, mailing addresses, and more.

1. From home, swipe up to access **Apps**, and tap **Contacts** .

2. Tap  to add a contact.

3. If you have multiple account types associated with your phone, select a contact type.
  - Select **Google** if you want to save contacts to your Google Account; these will be synced automatically with your Google Account online.
  - Select **Phone contact** as the sync account if you want your contacts on your phone only; they will not be synced with your Google Account.
4. Use the keyboard to enter as much information as you want.
  - Photo: Tap the photo icon to assign a picture to the contact.
  - Name
  - Phone
  - Email
  - Add another field: Tap **More fields** to include additional information such as Address, IM, Notes, Nickname, Website, etc.

**Note:** To select a type (label) for a phone number, email address or postal address (such as Mobile, Home, Work, etc.), tap the type to the left of the field and select the appropriate type.

5. When you have finished adding information, tap **SAVE**.

### ***Save a phone number***

You can save a phone number to Contacts directly from the phone keypad.

1. From home, tap **Phone**  > **Keypad** .
2. Enter a phone number and tap **Create new contact** to add a new contact or tap **Add to a contact** to add the number to an existing contact.

3. To add the number to an existing contact, tap the target contact you want to update, and select a number type for the new number. To add a new contact, enter the name and any additional information.
4. Tap **SAVE**.

## *View contacts*

View a contact's details by displaying a contact entry.

1. From home, swipe up to access **Apps**, and tap **Contacts** .
2. Tap a contact to view its details.

## Contacts screen layout

The following illustration show's your Contacts app layout and describes the various features.

Item	Description
<b>Favorites</b>	Show favorite contacts.
<b>Contact</b>	Tap to show contact's details.
<b>Contact image</b>	Tap to show thumbnail of contact entry. Tap an icon to place a call, send a message, etc.
<b>Search</b>	Search contacts.
<b>Index</b>	Browse contacts by letter.
<b>Add new</b>	Add a new contact.

## Edit a contact

Once you've added a contact, you can add or edit any of the information in the entry, assign a caller ID picture, customize with a unique ringtone, and more.

1. From home, swipe up to access **Apps**, and tap **Contacts** .
2. Tap a contact to view its details

3. Tap **Edit** .
4. Tap any field you want to change or add.
5. Add or edit the information, and then tap **SAVE**.

**Note:** To select a type (label) for a phone number, email address, or postal address (such as Mobile, Home, Work, etc.), tap the type to the left of the field.

## *Delete a contact*

You can delete a contact from the contacts details page.

1. From home, swipe up to access **Apps**, and tap **Contacts** .
2. Tap a contact to view its details.
3. Tap **Menu**  > **Delete**.

4. Tap **DELETE**.

## *Share a contact*

You can quickly share contacts using Bluetooth, Gmail, or text messaging.

1. From home, swipe up to access **Apps**, and tap **Contacts** .
2. Tap a contact and tap **Menu**  > **Share**.
3. Select a method to share.

- **Messages** to send the information via messages. You can select an existing message conversation or create a new message to send it. For more information about sending messages, see [Send a multimedia message \(MMS\)](#).
- **Bluetooth** to send the information via Bluetooth. See [Bluetooth](#) for information on pairing and sending via Bluetooth.
- **Gmail** to send the information as a Gmail attachment. Address the message, add a subject and a message, and then tap **Send**. See [Create and send a Gmail message](#) for details.
- **Save to Drive**

4. Complete the required steps as prompted for the selected method.

## *Import contacts*

Your phone offers a couple of options for importing contacts from installed SD cards or external devices via USB.

### *Before importing contacts from an SD card*

You will need to have installed an SD card with previously backed up contacts information into your phone before you can import contacts. See [SD card](#) for SD card information.

### *Import contacts from an SD card or USB storage*

1. From home, swipe up to access **Apps**, and tap **Contacts** .
2. Tap **Menu**  > **Settings** > **Import**.
3. Select copy contacts from **Internal shared storage** or **SD card**, and tap **NEXT**.
4. Select a destination for the imported contacts.
5. Follow the onscreen instructions to complete the import.

## *Back up contacts*

If you are saving contacts to an account that does not automatically back them up via the Cloud, you can manually back them up to an optional installed SD card for re-import if needed.

### *Before backing up contacts to an SD card*

You will need to have installed an SD card with previously backed up contacts information into your phone before you can back up your contacts.

### *Back up contacts to your SD card*

1. From home, swipe up to access **Apps**, and tap **Contacts** .

2. Tap **Menu** ≡ > **Settings** > **Export**.
3. Tap **Export to .vcf file**, all contacts will be saved in format of .vcf at **Files** > **Downloads**.
4. Tap **Share all contacts** to export contacts and go to Notification panel to share contacts via Messages, Bluetooth, Gmail, etc.

# Messages

With wireless service and your phone's messaging capabilities, you have the opportunity to share information through many different channels and accounts, including Gmail (Google), personal and corporate email, and text and multimedia messaging.

## *Text and multimedia messages*

With text messaging (SMS), you can send and receive instant text messages between your wireless phone and another messaging-ready phone.

Multimedia messages, or MMS, can contain text and pictures, recorded voice, audio or video files, picture slideshows, contact cards (vCard).

See your service plan for applicable charges for messaging.

## *Send a text message*

Quickly compose and send text messages on your phone.

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Tap **Compose** .
3. Enter a contact name or mobile number in the **To** field.
  - Enter phone numbers directly in the To field. If you're sending the message to several phone numbers, separate the phone numbers with a comma. As you enter information, any matching phone numbers from your contacts list are displayed. Tap a match to enter that number or address directly.
  - Scroll the screen down to find and select the contacts to whom you want to send the message. You can also select contact groups as recipients.
4. Tap the "Text message" box and then start composing your message.

**Note:** A counter appears above the **Send**  to tell you how many characters you have entered and how many characters are left. If you exceed the limit, your text message will be delivered as one but will be charged as more than one message.

5. When done, tap **Send**  to send the text message.

**Note:** Your text message automatically becomes a multimedia message if you enter an email address as the recipient, attach an item, or compose a very long message.

### *Send a multimedia message (MMS)*

When you need to add a little more to a text message, you can send a multimedia message (MMS) with pictures, voice recordings, audio or video files, contact cards (vCard).

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Tap **Compose** . The Compose screen opens.
3. Fill in one or more recipients. You can:
  - Enter phone numbers directly in the To field. If you're sending the message to several phone numbers, separate the phone numbers with a comma. As you enter information, any matching phone numbers from your contacts list are displayed. Tap a match to enter that number or address directly.
  - Scroll the screen down to find and select the contacts to whom you want to send the message. You can also select contact groups as recipients.
  - Enter an email address.
4. Tap the "Text message" box, and then start composing your message.

5. Tap **Add**  to the left side of the enter text bar.
6. Select one item to add.
  - **Emoji** : Insert an emoji to the text message.
  - **Sticker** : Choose an animated sticker to the multimedia message.
  - **Picture** : Select **Camera**  to take a picture to attach or select a stored picture to attach.
  - **Payment** : Send money or request money through Google Pay.
  - **Location** : Share your location to the contact.
  - **Audio** : Select **Record audio**  to make a voice recording and attach it or select a stored audio to attach.

Depending on different conditions, there may be more options to select from.

7. After adding an attachment, tap it to view, and tap  to delete the attachment.
8. Tap **Send**  to send the MMS message.

### *Save and resume a draft message*

While composing a text or multimedia message, tap **Back** button  to automatically save your message as a draft.

To resume composing the message:

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Tap the message to resume editing it.
3. When you finish editing the message, tap **Send** .

### *New messages notification*

Depending on your notification settings, the phone will play a ringtone, vibrate, or display the message briefly in the status bar when you receive a new text or multimedia message. To change the notification for new text and multimedia messages, see [Text and MMS Options](#) for details.

A new message icon () also appears in the notifications area of the status bar to notify you of a new text or multimedia message. The Messages application icon (if shown on the home screen) also displays the number of new messages .

- To open the message, drag the status bar down to open the notification panel. Tap the new message to open and read it. For information on reading and replying to messages, see [Manage message conversations](#).

## *Manage message conversations*

Text and multimedia messages that are sent to and received from a contact (or a number) are grouped into conversations or message threads in the Messaging screen. Text or MMS conversations let you see exchanged messages (similar to a chat program) with a contact on the screen.

### ***Read a text message***

- On the Messaging screen, tap the text message or conversation to open and read it.
- If you have a new message notification, drag the status bar down to open the notification panel. Tap the new message to open and read it.

To return to the Messaging screen from a conversation, tap **Back** button .

### ***View a multimedia message (MMS)***

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Tap a multimedia message or conversation to open.
3. Tap the attachment to open it.
  - If the attachment is a vCard contact, it is imported to your phone's contacts list. For more information, see [Contacts](#).
  - If the attachment is a vCalendar file, you can choose the calendar where you want to save the event. For more information on using Calendar, see [Calendar](#).
4. To save the attachment to device memory or an SD card, touch and hold the sender's name or number, and then tap **SAVE** on the options menu.

**Note:** When Auto-retrieve in MMS settings is disabled, only the message header is downloaded. To download the entire message, tap the **Download** button at the right side of the message. For more details, see [Text and MMS options](#).

If you are concerned about the size of your data downloads, check the multimedia message size before you download it.

### ***Reply to a message***

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Tap a conversation to open it.

3. Tap the text box at the bottom of the screen, enter your reply message, and then tap **Send** .

**Note:** To reply to a text message with a multimedia message, open the text message, and tap **Add**  to add a picture, location, audio, etc. The text message is automatically converted into a multimedia message.

### ***Archive a message***

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Tap a conversation.
3. Touch and hold the message that you want to archive.
4. Tap **Archive** .

### ***Delete conversations***

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Select the conversations you want to delete, touch and hold the message.
3. Tap .
4. Tap **DELETE** to confirm. Any locked messages will not be deleted unless you select the **Delete locked messages** check box.

**Tip:** You can also delete a conversation while you're viewing it. While viewing a conversation, tap **Menu**  > , and then tap **DELETE** to confirm. Any locked messages in the conversation will not be deleted unless you select the **Delete locked messages** check box.

### ***Delete a single message***

1. While viewing a conversation, touch and hold the message that you want to delete.
  - If the message is locked, tap  > **Unlock** on the options menu and hold the message to display the options menu again.
2. Tap  on the options menu.
3. Tap **DELETE** to confirm.

### ***View contact information from a message***

When you have received a message from someone in your stored contacts, you can tap the contact's picture or icon in the conversation to open a menu of options. Depending on the

stored contact information, you can view the contact details, place a phone call or send an email message to the contact, and more.

## *Text and MMS options*

The messages settings menu lets you control options for your text and MMS messages including message limits, size settings, and notifications.

1. From home, swipe up to access **Apps**, and tap **Messages** .
2. Tap **Menu**  > **Settings**. You can set the following:
  - **Default SMS app:** Tap to set the default SMS app.
  - **Notifications:** Tap to enable or disable notification, set importance, and enable or disable the display of notification dot on messages app icon when new messages received.
  - **Hear outgoing message sounds:** Slide the switch to the **On**  position to activate.
  - **Your current country:** Tap to set your current country.
  - **Advanced:**
    - Group messaging:** Tap to send an SMS reply to all recipients and get individual replies (mass text), or send an MMS reply to all recipients (group MMS).
    - Auto-download MMS:** Slide the switch to the **On**  or **Off**  position to enable or disable MMS downloading automatically. When enabled, the multimedia message header plus the message body and attachments will automatically download to your phone. If disabled, only the multimedia message header will be retrieved and shown in your Messaging screen.
    - Auto-download MMS when roaming:** Slide the switch to the **On**  or **Off**  position to enable or disable MMS downloading automatically when roaming. When enabled, it may incur significant phone charges.
    - Use simple characters:** Slide the switch to the **On**  or **Off**  position to enable or disable the use of simple characters.
    - Get SMS delivery reports:** Slide the switch to the **On**  or **Off**  position to get or not get SMS delivery reports.
    - SIM card messages:** Tap to view SIM card messages.
    - Phone number:** View your phone number.

# Gmail

Use Google's Gmail service and your Google Account to send, receive, and manage your Gmail messages. Before using Gmail, you must register a Google (Gmail) Account on your phone. See [Google Account](#) for details.

## Gmail cautions

Gmail is handled as email from a PC. Restricting email from PCs on your phone prevents your phone from receiving Gmail.

## Create and send a Gmail message

Use your phone to create and send Gmail messages.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. From the inbox, tap  to compose a new Gmail message.
3. Enter the message recipient(s), subject, and message, and then tap **Send** .

## Gmail composition options

- **Adding Cc/Bcc:** In the mail composition window, tap  near **To** bar, and then add recipients.
- **Attaching pictures or videos:** In the mail composition window, tap  > **Attach file**. Locate and then tap the picture or video you want to attach.

- **Save as a draft (Send later):** While composing your message, tap **Menu**  > **Save draft**, or press the **Back** button  to save as a draft.
- **Delete mail being composed:** In the mail composition window, tap **Menu**  > **Discard**.

**Note:** To view your draft email messages, in the inbox, tap  > **Drafts**. To view your sent messages, in the inbox, tap  > **Sent**.

## *Check received Gmail messages*

Your phone allows you to access, read, and reply to all your Gmail messages.

### ***Open Gmail messages from notifications***

When new Gmail arrives, you will see  in the status bar.

1. Drag the status bar down to display the notification panel.
2. Tap the new message from the notification panel.

If you have two or more new Gmail messages, tapping the notification opens the Gmail inbox.

### ***Open Gmail messages from the inbox***

You can also read and reply to all your Gmail messages from the Gmail inbox.

1. From home, swipe up to access **Apps**, and tap **Gmail** .

2. Tap the message thread you want to view.

### ***Options when reviewing Gmail messages***

- **Replying to Gmail messages:** With the Gmail message open, tap **Reply** , compose your reply message, and tap **Send** . To reply to all, tap **Options**  > **Reply all**.
- **Forwarding Gmail messages:** With the Gmail message open, tap **Options**  > **Forward**, enter a recipient and an additional message, and tap **Send** .

### ***Use Gmail labels***

Gmail saves all mail in one box, but you can add labels that allow you to sort your Gmail conversation threads. For example, when a new thread starts with a received mail, the label "Inbox" is automatically added to the thread. By then adding the label "travel," all threads with "travel" are shown in a list.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. Touch and hold a conversation thread to add a checkmark to it, and then tap **Options**  > **Change labels**.

3. Tap a label for the thread.

### *Archive Gmail threads*

Remove sent and received Gmail threads so they do not appear in the inbox. When replies arrive for archived threads, they appear in the inbox again.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. Touch and hold a conversation thread to add a checkmark to it, and then tap **Archive** .

### *Mute Gmail threads*

If registered on a mailing list, there will be threads with always-continuing conversations. For long threads that are not important, mute the threads and they will no longer appear in the inbox. When mail arrives that includes user's address as a recipient or in Cc, mail will again appear in the inbox.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. Touch and hold a conversation thread to add a checkmark to it, and then tap **Options**  > **Mute**. The thread is now hidden.

### *Delete Gmail threads*

If you no longer wish to keep a Gmail conversation thread, you can simply delete it from the inbox.

1. From home, swipe up to access **Apps**, and tap **Gmail** .

2. Touch and hold a conversation thread to add a checkmark to it, and then tap **Delete**  > **OK**.

## *Search Gmail messages*

If you need to find a specific message or message thread, you can search Gmail from the inbox.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. Tap .

3. Enter your search text and tap .

## *Report spam or phishing Gmail*

You can report spam or phishing Gmail messages from your phone's Gmail inbox.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. Touch and hold a conversation thread to add a checkmark to it, and then tap **Options**  > **Report spam** or **Report phishing**. The selected message is reported as spam or phishing Gmail.

## *Add another Google (Gmail) Account*

If you have multiple Gmail accounts you wish to view on your phone, you can add them from the **Settings** > **Accounts** menu.

1. From home, swipe up to access **Apps**, and tap **Settings** .

2. Tap **Accounts > Add account**.

3. Tap **Google**, and then tap **Enter your email**.

4. Enter your Gmail username and password, and then tap **NEXT**.

5. After your phone connects with the Google servers, select the items you would like to sync with your phone and then tap **Sync now**.

6. Tap **Finish setup**.

You are signed in to your Google Account, and you can access both of your Gmail accounts from the Gmail app.

**Note:** You can also sign up for a new Gmail account from the Settings menu. In step 2 above, tap **Or create a new account** and follow the prompts.

## Switching between Gmail Accounts

If you have more than one Gmail account set up, you can switch between them in the Gmail app.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. Tap .

3. Tap the account you want to view from the list at the top of the menu.  
The selected account inbox is displayed.

## Gmail settings

You can access settings for the Gmail app and for your individual Gmail accounts from the Gmail Settings menu.

1. From home, swipe up to access **Apps**, and tap **Gmail** .
2. Tap **Menu**  > **Settings**.

3. Tap **General settings** to access settings for all accounts or tap an **account name** to configure settings for a specific Gmail account.
- **General settings:** Gmail default action, Conversation view, Swipe actions, Sender image, Reply all, Auto-fit messages, Auto advance, Confirm before deleting, Confirm before archiving, and Confirm before sending.
  - **Account settings:** Inbox type, Inbox categories, Notifications, Inbox sound & vibrate, Signature, Vacation responder, Sync Gmail, Days of mail to sync, Manage labels, Download attachments, and Images.

**Note:** Available settings are subject to change.

# Internet and social networking

The following topics describe how to connect to and use the Internet on your phone, and how to access popular social networking sites such as Facebook, Twitter, Duo, and more.

## Chrome browser

If you are signed in with a Google Account, the Chrome browser will import all your bookmarks and other Web preferences for use on your phone.

1. From home, swipe up to access **Apps**, and tap **Chrome** .
2. Tap the addresses bar at the top and enter search words (for a Google search) or a Web address (URL). The search results will appear or a Web page opens.

### Viewing Web pages

When opening a website, you can navigate on Web pages by sliding your finger on the screen in any direction to locate the information you want to view.

Pinch/Spread your finger on the screen to zoom out/in of the Web page. To quickly zoom into a section of a Web page, double tap on the section you want to view. To return to the normal zoom level, double tap again.

### To manage a link, phone number or address displayed on a Web page

<b>Link</b>	Tap the link to open the Web page.  Touch and hold the link to open options for further operation, like open in new window, save link, share link, copy link, etc.
<b>Phone number</b>	Tap to call the phone number.
<b>Address</b>	Tap to open Google Maps and locate the address.

### To view Chrome browser history

1. From home, swipe up to access **Apps**, and tap **Chrome** .
2. Tap  to access options menu.
3. Tap **History** to view Chrome browser history.

### To bookmark a Web page

1. From home, swipe up to access **Apps**, and tap **Chrome** .
2. Open the Web page you want to bookmark.
3. Tap  to display menu options and tap  to add it to Bookmarks.

4. On the screen prompted at the bottom, tap **EDIT** to edit the bookmark name and select folder of the bookmark to store to. Or you can access edit screen by tapping  > .

### ***To open a bookmark***

1. From home, swipe up to access **Apps**, and tap **Chrome** .
2. Tap  to access options menu and tap **Bookmarks**.
3. Tap the bookmark you want to open.
4. You can also touch and hold the bookmark to select, tap  on the upper right corner of the screen, and touch **Open in new tab** or **Open in incognito tab**.

### ***To edit a bookmark***

1. From home, swipe up to access **Apps**, and tap **Chrome** .
2. Tap  to access options menu and tap **Bookmarks**.
3. Touch and hold the bookmark you want to edit.
4. Tap  to access edit screen.

### ***Chrome support***

1. From home, swipe up to access **Apps**, and tap **Chrome** .
2. Tap **Menu**  > **Help & feedback**.

**Tip:** For more information, visit: [google.com/intl/en/chrome/browser/mobile/](https://google.com/intl/en/chrome/browser/mobile/).

## ***Facebook***

Post updates, read what your friends are up to, upload pictures and check-ins, and more with on-the-go Facebook access.

### ***Sign in to your Facebook account or create a new account***

1. From home, swipe up to access **Apps**, and tap **Facebook** .
2. Enter your mobile number or email and password and tap **Log In**, or tap **Create New Account** to join Facebook by following a few easy steps.
3. Once completed, your Facebook account is added to your phone.

## *Use Facebook*

Once you've either created an account or signed in, you can post and read updates, upload pictures, tag locations, and more, all from your phone.

1. From home, swipe up to access **Apps**, and tap **Facebook** .
2. Tap **Status** and type an update, tap **Photo** and upload a picture from the gallery, tap **Check In** to share your location, "Like" and comment on friends' posts, and more.

## *Twitter*

Tweet (post messages) and view other people's tweets on Twitter. Login may be required to use Twitter. For more details about Twitter, visit [twitter.com](https://twitter.com).

### *Install the Twitter app on your phone*

Before you can use Twitter on your phone, you have to download and install the app from Google Play.

1. From home, swipe up to access **Apps**, and tap **Play Store** .
2. Tap Search icon and search for "twitter".
3. Tap **Twitter** from the results list.
4. Tap **Install**, and then tap **Accept**. The app will be downloaded and installed on your phone.
5. When the download has completed, tap **Open**.
  - To open the app from the home screen, swipe up to access **Apps**, and tap **Twitter** .

### *Tweet on Twitter*

Read Twitter feeds, follow your friends, and tweet your own updates right from your phone.

1. From home, swipe up to access **Apps**, and tap **Twitter** .

If this is the first time you've used Twitter on your phone, tap **Log in** to sign in to an existing account or tap **Create my account** or **Sign up a different account** to set up a new Twitter account.
2. Tap the "What's happening?" text box, type a tweet, and tap **TWEET**. The tweet is sent and appears on your Twitter feed.

# Connectivity

The following topics address your phone's connectivity options, including USB file transfer, Wi-Fi, Bluetooth, IR connectivity, and more.

## Transfer files between your phone and a computer

You can use the supplied USB cable to connect your phone directly to your computer and transfer music, pictures, and other content files.

For example, if you have a music album stored on your computer that you want to listen to on your phone with any of the music apps, just attach your phone to the computer and copy the files to the music folder.

### File transfer tips

- If you want to save data to an SD card on your phone, make sure the SD card is installed and active. For more information, see [SD card](#).
- Avoid removing the battery or SD card while transferring data.
- Data exchange may use the methods outlined in the following table:

Method	Description
<b>Media Device (MTP)</b>	Transfer files between your phone and PC such as pictures, videos, and music.
<b>Camera (PTP)</b>	Transfer picture and video files between your phone and PC.

### Transfer files between the phone and a computer

1. Connect your phone to your computer using the supplied USB/charging cable.

- Insert the end of the cable to the charger/accessory jack at the bottom of the phone.
- Insert the USB end of the cable into an available USB port on your computer. You may need to remove the USB cable from the charging head to access it.

2. Drag the status bar down to display the notification panel. You will see **USB debugging connected**.
3. To transfer files from your phone to your computer:
  - From home, swipe up to access **Apps**, and tap **Settings** .
  - Tap **Connected devices > USB**.
  - Tap **Transfer files**. You can also select other options available.

4. On your computer, navigate to the detected device (such as through the My Computer menu) and open it.
5. If available, select a drive (**Internal shared storage** or **SD card**).
6. Select a folder and copy files from your computer to your phone or from your phone to your computer.
7. When done, disconnect your phone from your computer.

## *Wi-Fi*

Wi-Fi provides wireless Internet access over distances of up to 300 feet. To use your phone's Wi-Fi, you need access to a wireless access point or "hotspot."

The availability and range of the Wi-Fi signal depends on a number of factors, including infrastructure and other objects through which the signal passes.

### *Turn Wi-Fi on and connect to a wireless network*

Use the wireless and networks setting menu to enable your phone's Wi-Fi radio and connect to an available Wi-Fi network.

1. From home, swipe up to access **Apps**, and tap **Settings** .

2. Tap **Network & Internet > Wi-Fi**.
3. Slide the Wi-Fi switch to the **On**  position.
  - Wi-Fi is enabled. You will see the names and security settings of in-range Wi-Fi networks.
  - To disable Wi-Fi, slide the Wi-Fi switch to the **Off**  position.
4. Tap a Wi-Fi network to connect, enter the password (if it's not an open network), and then tap **Connect**.

Your phone is connected to the Wi-Fi network. You will see (  ) in the status bar.

- The password, for a household wireless LAN router, is sometimes found on a sticker on the router (WEP, WPA, KEY, etc.). Contact the router manufacturer for information. For password for a public wireless LAN, check with user's service provider.
- Entering a password is not required if an access point is not security protected.

**Note:** The next time your phone connects to a previously accessed secured wireless network, you will not be prompted to enter the password again, unless you reset your phone to its factory default settings or you instruct the phone to forget the network.

**Note:** Wi-Fi networks are self-discoverable, which means no additional steps are required for your phone to connect to a Wi-Fi network. It may be necessary to provide a user name and password for certain closed wireless networks.

## *Wi-Fi settings*

Use the Wi-Fi settings menu to manually set your Wi-Fi connection options.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.
3. Slide the Wi-Fi switch to the **On**  position.
  - Wi-Fi is enabled. You will see the names and security settings of in-range Wi-Fi networks.
  - To disable Wi-Fi, slide the Wi-Fi switch to the **Off**  position.
4. Tap **Wi-Fi preferences** on the bottom of the Wi-Fi screen.
5. Configure your Wi-Fi settings.

## *Disconnect Wi-Fi*

You may wish to disconnect from a connected Wi-Fi network without turning Wi-Fi off.

1. From home, swipe up to access **Apps**, and tap **Settings** .

2. Tap **Network & Internet > Wi-Fi**.
3. Tap the name of the connected access point and then tap **FORGET**.
  - After disconnecting from an access point, you may need to re-enter the password to reconnect.

## *Wi-Fi Direct*

Use Wi-Fi Direct to connect directly to other Wi-Fi Direct devices simply via Wi-Fi, without an access point or via the Internet.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.
3. Slide the Wi-Fi switch to the **On**  position.
  - Wi-Fi is enabled. You will see the names and security settings of in-range Wi-Fi networks.
4. Tap **Wi-Fi preference** on the bottom of the Wi-Fi screen.
5. Tap **Advanced > Wi-Fi Direct**.
  - Wi-Fi Direct and Wi-Fi are available at the same time.
6. Tap a device with which to connect.
  - a) If connected via Wi-Fi, you will see a confirmation. Follow the onscreen instructions.
7. Accept the connection on the other device.

The phone is connected via Wi-Fi Direct.

  - a) If a connection is not accepted after a certain period, the connection request is canceled.
  - b) To stop a connection, tap the connected device name, tap **OK** to confirm disconnection.

## *Bluetooth*

Bluetooth is a short-range communications technology that allows you to connect wirelessly to a number of Bluetooth devices, such as headsets and hands-free car kits, and Bluetooth-enabled handhelds, computers, printers, and wireless phones. The Bluetooth communication range is usually approximately 30 feet.

### **Bluetooth hints**

**Question:** Can't use Bluetooth?

**Answer:** Is your phone in airplane mode? Bluetooth is unavailable in airplane mode.

### Bluetooth function cautions

Information may not appear correctly on connected devices depending on the transferred data.

### *Bluetooth information*

Bluetooth is a technology that enables wireless connection with PCs, Bluetooth devices with handsfree features, etc.

Function	Description
<b>Audio output</b>	Wirelessly listen to music, podcasts, etc.
<b>Hands-free calls</b>	Call hands-free, using Bluetooth-capable hands-free devices and headsets.
<b>Data exchange</b>	Exchange data with Bluetooth devices.

### *Enable the Bluetooth feature*

Use the settings menu to enable or disable your phone's Bluetooth capabilities.

- Wireless connection to all Bluetooth functions is not guaranteed for the phone.
- The phone may not connect properly depending on the other device.
- Noise may be experienced with wireless calls and hands-free calls depending on the conditions.

To enable Bluetooth:

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.

3. Slide the Bluetooth switch to the **On**  position.

- To disable Bluetooth, slide the Bluetooth switch to the **Off**  position.

**Tip:** You can also turn Bluetooth on or off with the toggle menu in the notification panel. Drag the status bar down to display the Notification panel and then tap **Bluetooth**  to turn it on.

**Note:** Turn off Bluetooth when not in use to conserve battery power, or in places where using a wireless phone is prohibited, such as aboard an aircraft and in hospitals.

## *Pair Bluetooth devices*

Search for and pair nearby Bluetooth devices. Registered Bluetooth devices can be connected simply. Enable the Bluetooth function on the Bluetooth devices being paired beforehand.

### ***To pair Bluetooth devices***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Pair new device**.

- Nearby devices appear in the “Available devices” list.
  - If a target device is not detected, tap **Refresh** to search again.
3. Tap a device from the “Available devices” list and follow the onscreen instructions to pair with the device.
    - Methods to accept a Bluetooth connection differ depending on the devices used.

### ***To forget from a paired device***

1. From home, swipe up to access **Apps**, and tap **Settings** .

2. Tap **Connected devices**.

3. Tap the paired device you wish to forget, and tap **Settings**  next to the paired device.

4. Tap **FORGET**.

The device is unpaired from your phone. To make another connection with the device, you will need to pair again.

### *Connect to a paired Bluetooth device*

You can listen to music over a Bluetooth stereo headset, or have hands-free conversations using a compatible Bluetooth headset or car kit. It's the same procedure to set up stereo audio and hands-free devices.

1. From home, swipe up to access **Apps**, and tap **Settings** .

2. Tap **Connected devices**.

3. Tap a connected device.

Your phone connects to the paired device.

The pairing and connection status is displayed below the device's name in the Bluetooth devices section. When the device is connected to your phone, the Bluetooth paired icon  is displayed in the status bar. Depending on the type of device you have connected, you can then start using the headset or car kit to listen to music or make and receive phone calls.

**Note:** Due to different specifications and features of other Bluetooth-compatible devices, display and operations may be different, and functions such as transfer or exchange may not be possible with all Bluetooth-compatible devices.

### *Send information using Bluetooth*

You can use Bluetooth to transfer information between your phone and another Bluetooth-enabled device such as a phone or notebook computer.

#### ***Types of data you can send via Bluetooth***

You can send the following types of information, depending on the device you are sending to:

- Images and videos
- Calendar events
- Contacts
- Audio files

In the instructions below, Contacts data is being used as an example.

#### ***Sending contacts data via Bluetooth***

1. From home, swipe up to access **Apps**, and tap **Contacts** .
2. Tap a contact to send.
3. Tap **Menu**  > **Share** > **Bluetooth**.

4. Tap a paired device to receive the data.

The contact information is sent.

### *Receive information via Bluetooth*

Your phone is capable of receiving a wide variety of file types with Bluetooth, including pictures, music tracks, and documents such as PDFs.

1. When another device attempts to send a file to your phone via Bluetooth, you will see a request to accept the file.
2. Tap **ACCEPT**.

Your phone has received the file.

- When your phone receives a file, you will see a notification. To open the file immediately, drag the status bar down to display the notification panel, and then tap the notification.
- When you open a received file, what happens next depends on the file type:
  - o Media files and documents are usually opened directly in a compatible application. For example, if you open a music track, it starts playing in the Music application.
  - o For a vCalendar file, select the calendar where you want to save the event, and then tap **Import**. The vCalendar is added to your Calendar events. For more information on using Calendar, see [Calendar](#).
  - o For a vCard contact file, if there are multiple vCard files on your storage card, you can choose to import one, several, or all of those contacts to your contacts list.

# **Apps and entertainment**

The topics in this section will explore the features that make your phone so much more than a phone, from the camera and productivity apps to music, entertainment, and more.

# Camera and video

You can use the camera or video camera to take and share pictures and videos. Your phone comes with a 5 megapixel camera that lets you capture sharp pictures and videos.

## Camera overview

The camera's viewfinder screen lets you view your subject and access camera controls and options.

Menu	Function/Service
 <b>Options menu</b>	Tap to select camera mode and settings options.
 <b>Theme</b>	Tap to select theme mode.
 <b>HDR boost</b>	Tap to activate or deactivate HDR boost mode.
 <b>Picture size ratio</b>	Tap to set the photo quality and aspect ratio.
 <b>Flash</b>	Tap to select flash modes.
 <b>Panorama</b>	Tap to activate panorama mode to create a linear image by taking pictures in either a horizontal or vertical direction.

 <b>Video mode</b>	Tap to access Video mode.
 <b>Photo mode</b>	Tap to access Photo mode.
 <b>Face detector</b>	Tap to access Face detector mode to enhance the focus of a selfie by adjusting blur to the background.
 <b>Face Beauty</b>	Tap to access Face Beauty mode to make your photo more beautiful.
 <b>Pictures</b>	View the last photo or video taken.
 <b>Capture</b>	Capture a photo.
 <b>Switch</b>	Switch between the front and main cameras.

## *Take pictures and record videos*

The following topics teach you how to take pictures and record videos with your phone's camera.

### **Camera cautions**

**If Lens becomes dirty:** Fingerprints/smudges on lens prevent capturing of clear still images/videos. Wipe lens with a soft cloth beforehand.

**Avoid exposure to direct sunlight:** Be careful not to expose lens to direct sunlight for long periods. May discolor color filter and affect color of images.

### *Take a picture*

You can take pictures using your phone's camera.

**Note:** If you have an SD card installed, pictures and videos are stored to the SD card. If no card is installed, pictures and videos are saved to your phone's memory.

1. From home, swipe up to access **Apps**, and tap **Camera** .
2. Tap  to switch to Photo mode.
3. Aim the camera at your subject and tap  to take the picture.

The shutter clicks and the picture is captured and saved to your phone or SD card.

### *Record videos*

You can record high-quality videos with your phone's video camera.

**Note:** If you have an SD card installed, pictures and videos are stored to the SD card. If no card is installed, pictures and videos are saved to your phone's memory.

1. From home, swipe up to access **Apps**, and tap **Camera** .
2. Tap  to switch to Video mode.
3. Aim the camera at your subject and tap  to start to record a video.
4. Tap  again to stop recording.

The camera stops recording and the video is captured and saved to your phone or SD card.

## *View pictures and video using Photos*

Using the Photos application, you can view pictures and watch videos that you've taken with your phone's camera, downloaded, or copied onto your storage card or phone memory. You can also take a look at your pictures and your friends' pictures that are on your social networks.

For pictures that are on your storage card or phone memory, you can do basic editing such as rotating and cropping. You can also easily assign a picture as your contact picture or wallpaper and share pictures with your friends.

## *View pictures and videos*

You can access and view all your stored pictures and videos from your phone's Gallery.

1. From home, swipe up to access **Apps**, and tap **Photos** .
2. Tap an album.

3. Tap an image or a video to view.

### ***Pictures and videos: review screen***

After capturing a picture or video, from the camera screen, tap the thumbnail image at the bottom left corner of the screen to see the item in the review screen. From there, you can access options such as save, view, send, or delete the picture or video.

### ***Pictures and videos: options while viewing***

- **Zoom in or out on a picture or video:** Tap the screen twice or pinch the screen to zoom in or out on a picture or video.
- **Viewing videos:** Use the onscreen controls to play, pause, or stop the video playback.

After selecting an album from the Albums tab, you can browse through the pictures and videos of that album. Tap a picture or video to view it in full screen. By default, the pictures and videos in an album are displayed in grid view.

**Note:** When viewing pictures, you can touch and hold on a picture or video to open a selection menu and choose what to do with the picture or video.

## ***Edit pictures***

Whether you're browsing pictures in filmstrip or grid view in the Gallery application, you can touch and hold on a picture to open a selection menu and choose to delete the picture, rotate or crop it, and more.

### ***Rotate and save a picture***

1. From home, swipe up to access **Apps**, and tap **Photos** .

2. Tap an album.
3. Tap the picture you want to rotate.
4. Tap  to access Edit screen.
5. Tap  and  to rotate the picture. When done, tap **DONE** to save.

### ***Crop a picture***

1. From home, swipe up to access **Apps**, and tap **Photos** .
2. Tap an album.
3. Tap the picture you want to crop.
4. Tap  to access Edit screen.
5. Tap . A crop box appears on the picture.
6. To adjust the crop box size, drag directional arrows inward or outward to resize the crop box.

To move the crop box to the part of the picture that you want to crop, drag the crop box to the desired size and position.

7. Tap **DONE** to apply the changes to the picture and save.

The cropped picture is saved in the album as a copy. The original picture remains unedited.

## *Share pictures and videos*

The Photos application lets you send pictures and videos using email or multimedia messages. You can share pictures on your social networks (such as Facebook, Flickr, Picasa, and Twitter) and share videos on YouTube. You can also send them to another phone or your computer using Bluetooth.

### *Send pictures or videos by Email*

You can send several pictures, videos, or both in a Gmail message. They are added as file attachments in your email. For more information about using Gmail, see [Create and send a Gmail message](#).

1. From home, swipe up to access **Apps**, and tap **Photos** .
2. Tap an album.
3. Tap the pictures or videos you want to share.
  - To select multiple items, touch and hold an image to turn on multiple select mode. Tap all the items you want to share.
4. Tap **Share** , and tap **Gmail** to send.

Follow onscreen prompts to complete and send the message.

**Note:** If you selected **Mail** and you have multiple email accounts, the default email account will be used.

For more information about using email and Gmail, see [Create and send a Gmail message](#).

### *Send a picture or video by multimedia message*

Multimedia Messaging (MMS) lets you send pictures and videos using your phone's messaging app. Although you can send several pictures or videos in a multimedia message, it may be better to just send one at a time, especially if the files are large in size.

1. From home, swipe up to access **Apps**, and tap **Photos** .
2. Tap an album.
3. Tap the pictures or videos you want to share.

To select multiple items, touch and hold an image to turn on multiple select mode. Tap all the items you want to share.

4. Tap **Share** , and tap **Messages** to send.

Follow the onscreen prompts to complete and send the message.

For more information about sending multimedia messages, see [Send a multimedia message \(MMS\)](#).

### *Send pictures or videos using Bluetooth*

You can select several pictures, videos, or both and send them to someone's phone or your computer using Bluetooth.

1. From home, swipe up to access **Apps**, and tap **Photos** .
2. Tap an album.
3. Tap the pictures or videos you want to share.

To select multiple items, touch and hold an image to turn on multiple select mode. Tap all the items you want to share.

4. Tap **Share** , and tap **Bluetooth** to send.

Follow the onscreen prompts to complete and send the files.

For more information, see [Bluetooth](#).

### *Share pictures or videos via additional apps or social media*

From Photos, you can share your pictures and videos from a variety of apps and social media sites, such as Facebook, Twitter, Instagram, YouTube, and more. Available apps will vary depending on what you have installed on your phone.

1. From home, swipe up to access **Apps**, and tap **Photos** .
2. Tap an album.
3. Tap the pictures or videos you want to share.

To select multiple items, touch and hold an image to turn on multiple select mode. Tap all the items you want to share.

4. Tap **Share**  to access **Share via** menu and tap the app you want to send.

5. Follow the prompts to complete and post or share your pictures or videos.

### *Share videos via YouTube*

From Gallery, you can share your videos from YouTube.

1. From home, swipe up to access **Apps**, and tap **Photos** .
2. Tap an album.
3. Tap the videos you want to share.

To select multiple items, touch and hold an image to turn on multiple select mode. Tap all the items you want to share.

4. Tap **Share** , and tap **YouTube** to send.
5. Follow the prompts to complete and share your videos.

### *Camera settings*

You can adjust your camera's settings using the icons on the main camera screen and the full camera settings menu.

### *Set camera functions*

You can configure your camera's settings to fit any situation and event.

1. From home, swipe up to access **Apps**, and tap **Camera** .
2. Tap .

3. Tap **Settings** tab.

Menu	Function/Service
 <b>Touch shot</b>	Tap to enable the starting of capturing picture or recording video by tapping on any places on the viewfinder screen.
 <b>Self-timer</b>	Tap to set countdown time.
 <b>Shutter sound</b>	Tap to activate sound when taking a picture.
 <b>Geo tagging</b>	Tap to add location info to your picture taken.
 <b>Picture size</b>	Tap to set picture size.
 <b>Anti-flicker</b>	Tap to select anti-flicker mode.
 <b>Water mark</b>	Tap to enable or disable water mark function.
 <b>Time Lapse</b>	Tap to set time of time lapse mode.

# Productivity

Use your phone to stay ahead of the game with calendar, navigation, alarm, office, and more productivity apps.

## Calendar

Use Calendar to create and manage events, meetings, and appointments. Your Calendar helps organize your time and reminds you of important events.

In order to sync with your Google calendar, you must sign in to a Google Account on your phone. See [Google Account](#).

### Calendar view

There are several ways the calendar can be viewed.

1. From home, swipe up to access **Apps**, and tap **Calendar** .

2. Tap .

  - **Schedule:** Display all plans.
  - **Day:** Display today's schedule by hour. Slide the screen to the left and right to display the previous and the next day.
  - **3 Days:** Display the previous day, today, and the next day. Slide the screen to the left and right to view previous and next three days.
  - **Week:** Display the current week. Slide the screen to the left and right to view the previous and the next week.

- **Month:** Display the current month. Slide the screen to the left and right to view the previous and the next month.

## Add an event

Use your Calendar to create events.

1. From home, swipe up to access **Apps**, and tap **Calendar** .

2. Tap **Add**  to add an event.
3. Enter an event title, start date/time, end date/time, etc., and then tap **SAVE**.

## View calendar events

1. From home, swipe up to access **Apps**, and tap **Calendar** .
2. Tap a date and tap an event to view the details.

## Edit an event

1. From home, swipe up to access **Apps**, and tap **Calendar** .
2. Tap a date and tap an event to view the details.
3. Tap  to edit the event.
4. When done, tap **SAVE**.

## Delete an event

1. From home, swipe up to access **Apps**, and tap **Calendar** .
2. Tap a date and tap an event to view the details.
3. Tap  to access options menu, and tap **Delete** to delete the event.

## Selecting a calendar

- If you have more than one calendar, select a calendar in which to add events:
  - Select **My Calendar** to create an event that will appear only on your phone.
  - Select your Google Account to create a Google Calendar event. If you have several Google Calendars on the Web, select one in which to add your event.

You can create multiple Google Calendars only in Google Calendar on the Web. After creating them in Google Calendar on the Web, you'll be able to see them in the Calendar application on your phone. For more information about creating and managing multiple Google Calendars, visit the Google website: [calendar.google.com](https://calendar.google.com).

- If you have synchronized your phone with an Exchange ActiveSync account or Outlook on your computer, you can also select these calendars.
- Select **PC Sync** to create an Outlook Calendar event to sync with your computer.
- Select **Exchange** to create an Exchange ActiveSync calendar event.

## Sync calendars

You can select which calendars you'd like to sync on your phone, along with what types of information you want to sync.

1. From home, swipe up to access **Apps**, and tap **Calendar** .
2. Tap **Menu**  > **Calendars**.

3. Select sync options by adding or removing check marks from the items.

The sync settings have been updated.

## *Calendar settings*

Use Calendar Settings to customize your calendar.

1. From home, swipe up to access **Apps**, and tap **Calendar** .
2. Tap **Menu**  to access options menu.
3. Tap **Settings > General**
4. Tap an option and follow the prompts.

## *Navigation apps*

Your phone offers a number of location-based navigation programs to help you figure out where you are and get you where you're going.

### *Enable location services on your phone*

Before using any location-based services, you must enable your phone's location feature. For information about setting your phone's location options, see [Location](#).

## *Google Maps*

Use the Google Maps app to determine your location, find directions, browse local businesses and attractions, rate and review places, and more.

### *View maps of specified places*

Use Google Maps to locate and map a specific address or destination.

1. From home, swipe up to access **Apps**, and tap **Maps** .

- If prompted, follow the onscreen instructions to accept terms of use.
2. Tap **Search** .
  3. Enter an address, city, facility name, etc., and then tap a candidate in the results list.

A map of the specified location opens.

### ***Google Maps operations***

- **Viewing current location:** From the Maps app, tap .
- **Obtain useful area information for current location:** From the Maps app, tap the search bar, enter the information you're looking for, and then tap a result to view it.
- **View traffic information, aerial photos, etc., in Maps :** From the Maps app, tap **Menu**  and then tap **Traffic, Satellite, Google Earth**, etc.
- **Check route to destination:** From the Maps app, tap , enter your current location and your destination, tap a method of transport (car, public transit, or on foot).
- Route candidates appear in a list.
- Check Detailed Operation for Maps: From the Maps app, tap **Menu**  > **Help**.

## Google Search

Search information saved on the phone and in phone applications as well as on the Internet.

### Use Google Search

Type search terms in the Google Search bar to find information on your phone and around the globe.

1. From home, tap the Google search bar, or swipe up to access Apps and tap **Google** .

The Search window opens.

- If confirmation appears, follow onscreen instructions.
- If a description for Google Now appears, tap **Next** and read information. Tap **Enable** on the last page if you want to use Google Now.

2. Type your search keywords and tap **Search** .

- To search by voice, tap  in the search bar and speak your search terms.

### Use Google voice search

Use your voice to search instead of typing, with Google Voice Search.

1. From home, swipe up to access Apps and tap **Google** .

2. Tap **Voice Search** .

3. Speak your search terms.

Search results appear.

# Calculator

Your phone's convenient built-in calculator lets you perform basic mathematical equations.

1. From home, swipe up to access **Apps**, and tap **Calculator** .

2. Enter the first number.
3. Tap an arithmetic function key and enter the second number.
4. Tap **=** to view the result.
5. Tap **CLR** to clear the results.

## View calculator history

You can view and clear your calculator history.

1. From home, swipe up to access **Apps**, and tap **Calculator** .
2. Tap  to access options menu.
3. Tap **History** to view calculator history.

- To return to the calculator, swipe up the screen or tap **Back** button .
- To clear the calculator history, tap , and tap **Clear**.

## Scientific calculator

1. From home, swipe up to access **Apps**, and tap **Calculator** .
2. Turn the device to landscape view more functions.

3. Or on the portrait mode, you can tap  on the right edge of the screen to view more advanced functions.

## Clock

Your phone has a clock app that lets you set alarms, view time in time zones around the world, use a stopwatch, set a timer, and use your phone as a desk clock.

### *Set the date and time*

Your phone automatically receives the current date and time from the wireless network. You can set the date and time manually.

1. From home, swipe up to access **Apps**, and tap **Clock** .

2. Tap  to access options menu.
3. Tap **Settings > Change date & time**.

### *Set alarms*

You can set multiple alarms using your phone's Clock app.

1. From home, swipe up to access **Apps**, and tap **Clock** .
2. Tap the **Alarm** .
3. Tap .

4. Set the time for the alarm and tap **OK**. You can also tap  to enter time directly.
5. On the screen prompted, there are more options to set.

Feature	Description
<b>Repeat</b>	Select the days to repeat the alarm.
<b>Alarm sound</b>	Select a sound to play for the alarm.
<b>Vibrate</b>	Mark the checkbox to activate vibration alert.
<b>Label</b>	Enter a name for the alarm.
<b>Dismiss</b>	Dismiss the current alarm.
<b>Delete</b>	Delete the current alarm.

*Turn off alarm*

At the set alarm time, the phone sounds the alarm and/or vibrates.

1. To stop an alarm, drag the alarm  to the dismiss .
2. To postpone the alarm, drag the alarm  to the snooze .

### *Delete an alarm*

You can delete an alarm created.

1. From home, swipe up to access **Apps**, and tap **Clock** .
2. Tap the alarm you want to delete from the alarm list.
3. Tap **Delete**.

### *Additional clock features*

Your phone's clock app provides additional useful features including world clock, stopwatch, and timer functions.

#### **World clock**

The world clock lets you keep track of the current time in multiple cities around the globe.

1. From home, swipe up to access **Apps**, and tap **Clock** .
2. Tap  to access World clock screen.

3. Locate the cities you want to add and mark the checkbox .

  - To remove a city, unmark the checkbox .

### **Stopwatch**

The stopwatch lets you time events down to the hundredth of a second.

1. From home, swipe up to access **Apps**, and tap **Clock** .
2. Tap  to access Stopwatch screen.
3. Enter the length of the stopwatch time.

4. Tap  to begin timing.
5. Tap  to stop timing.

- To resume timing, tap  again.
- To reset the Stopwatch to zero, tap **RESET**.
- To delete the timer, tap **DELETE**.
- To add a timer, tap **ADD TIMER**. Swipe up and down to view other timers.

### **Timer**

The timer provides a countdown timer for up to 99 hours, 59 minutes, and 59 seconds.

1. From home, swipe up to access **Apps**, and tap **Clock** .
2. Tap  to access Timer screen.

3. Tap  to begin the timer.
4. Tap  to stop the timer.
  - To resume timing, tap  again.
5. Tap **RESET** to reset the Timer.
6. Tap **SHARE** to share the Timer.

### *Clock settings*

You can set a batch of settings on Clock, Alarms, and Timers.

1. From home, swipe up to access **Apps**, and tap **Clock** .
2. Tap  to access options menu.
3. Tap **Settings**.

# Entertainment and activities

The following topics provide an overview of your phone's entertainment apps, from music players, YouTube, and more.

## Google Play Music app

The Google Play Music app lets you browse, shop, and play back songs purchased from Google Play as well as songs you have loaded from your own music library. The music you choose is automatically stored in your Google Play Music library and instantly ready to play via streaming or download.

For more information about Google Play Music, visit [play.google.com/about/music](http://play.google.com/about/music).

**Note:** For information about loading music onto your phone, see [Transfer files between your phone and a computer](#).

## Play Music with Google Play

Use the Google Play Music app to listen to all your music on your phone. Compatible music file formats include: mp3, wma, wav, mod, etc.

1. From home, swipe up to access **Apps**, and tap **Play Music** .

The Play Music app opens to Home.

2. Tap **Menu**  to access options menu and tap **Music library**.
3. Flick the screen left or right and select a library category such as Artist or Albums.
4. Tap an item from the category window and tap a song.
5. Tap  to play.

## Google Play Music screen layout

The following picture outlines the main features of the Play Music app player screen.

Feature	Description
 <b>Options menu</b>	Find more options on this menu.
 <b>Return to playlist</b>	Tap to switch from current playing song screen to playlist.
 <b>Repeat mode</b>	Tap to select repeat mode.
 <b>Previous song</b>	Tap to play the previous song.
 <b>Play in random</b>	Tap to play music in a random order.
 <b>Next song</b>	Tap to play the next song.
 <b>Play/pause</b>	Tap to play or stop playing a song.

## Create playlists in Google Play Music

Organize music into playlists to fit every occasion.

1. From home, swipe up to access **Apps**, and tap **Play Music** .

2. Flick the screen left or right and select a library category such as Artist or Albums.
3. Tap  and select **Music library** category to choose **Artist** or **Albums**.
4. Tap **New playlist**.
5. Enter a name and tap **OK**.
6. Return to the library view and select Albums or Songs.
7. Tap  next to an item and then tap **Add to playlist > <playlist name>**.  
The song or album is added to the playlist. Repeat to add more items to the playlist.

### ***Adding currently playing music to a playlist***

1. From home, swipe up to access **Apps**, and tap **Play Music** .
2. Tap  > **Add to playlist > <playlist name>**.

The music is added to the playlist.

## ***YouTube***

View videos uploaded to YouTube and upload your own videos to your YouTube account.

### ***View YouTube videos***

You can use the YouTube app to view videos on YouTube even if you aren't signed in to a YouTube account.

1. From home, swipe up to access **Apps**, and tap **YouTube** .

- If you're prompted to provide confirmation to use the site, follow the onscreen instructions to continue.
2. Search through the YouTube channels and tap a video you want to see.
  3. The video plays on your phone screen.
    - Tap the screen to pause or resume play while watching.

### *Post a video to YouTube*

You can post videos to your YouTube account from your phone. Before posting, you must set up a YouTube account and sign in to it on your phone.

1. From home, swipe up to access **Apps**, and tap **YouTube** .
2. Tap **Options**  > **Uploads**.
3. Select a video to upload. Enter a title, description, and tags, and select a privacy setting.
4. Tap . The video is uploaded to your YouTube channel.

# ***Settings***

---

The topics in this section will cover your phone's settings menus and options.

## Basic settings

From the home screen, swipe up to access **Apps**, and tap **Settings**  to access your phone's settings menu. You can also access Settings from the status bar. Drag the status bar down twice and tap **Settings** .

The table below outlines the top-level settings categories.

Category	Description
<b>Network &amp; Internet</b>	Set Wi-Fi, mobile network, Hotspot, VPN, airplane mode, and view data usage.
<b>Connected devices</b>	Manage the settings on connected devices, like Bluetooth, Cast, USB, etc.
<b>Apps &amp; notifications</b>	View your recently opened Apps, manage the settings on notifications, permissions, etc.
<b>Battery</b>	Monitor your phone's battery usage.
<b>Display</b>	Set wallpaper, brightness, font size, etc.
<b>Sound</b>	Set ringtone, operation tones, etc.
<b>Storage</b>	Manage internal storage on your phone and provides menu choices for an optional SD card (not included).
<b>Security &amp; location</b>	Set location access options, screen lock method, password visibility, encryption & credential storage options, etc.
<b>Accounts</b>	Manage all your email, social networking, and picture and video sharing accounts.
<b>Accessibility</b>	Set accessibility options such as screen magnification, hearing aid compatibility, etc.
<b>View Quick Start Guide</b>	View basic steps to get your phone setup quickly and easily.
<b>Google</b>	Check and set Google service options.
<b>System</b>	Set language and time, manage reset options, enable backup, check phone updates, and view more important information about your phone.

# Network & Internet

Manage connections between your phone and a variety of network and other devices.

## Wi-Fi

The Wi-Fi settings menu lets you turn Wi-Fi on or off, set up and connect to available Wi-Fi networks, and configure advanced Wi-Fi options.

### Connect your device to a Wi-Fi network

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.

3. Slide the Wi-Fi switch to the **On**  position.

Your phone will automatically search for available networks and you can see the names and security settings of in-range Wi-Fi networks.

- To disable Wi-Fi, slide the Wi-Fi switch to the **Off**  position.

4. Tap the Wi-Fi network you want to connect to, enter a password, and tap **CONNECT**. Your phone is connected to the selected Wi-Fi network.
5. Configure your Wi-Fi settings.

- The password, for a household wireless LAN router, is sometimes found on a sticker on the router (WEP, WPA, KEY, etc.). Contact the router manufacturer for information. For password for a public wireless LAN, check with user's service provider.
- Entering a password is not required if an access point is not security protected.

### *Manually connect to a Wi-Fi network*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.
3. Slide the Wi-Fi switch to the **On**  position to turn it on.
4. Tap **Add network** from the bottom of the Wi-Fi screen.
5. Enter the required information about the Wi-Fi network.

- **Network name:** Enter the network name.
- **Security:** Select a security option and enter your password.

- **Advanced options:** Show advanced options, such as IP settings and Proxy settings.

## *Wi-Fi preferences*

The advanced Wi-Fi settings menu lets you set up and manage wireless access points.

### ***Turn on Wi-Fi automatically***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.
3. Tap **Wi-Fi preferences** from the bottom of Wi-Fi screen.
4. Slide the **Turn on Wi-Fi automatically** switch to the **On**  position.
  - To turn on Wi-Fi automatically, firstly you need to turn on Wi-Fi scanning.
  - Wi-Fi will be turned on automatically when you are near high-quality saved networks, like your home network.

### ***Open network notification***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.
3. Tap **Wi-Fi preferences** from the bottom of Wi-Fi screen.
4. Slide the **Open network notification** switch to the **On**  position.
  - The setting is available when Wi-Fi is turned on.
  - Slide the switch to the **Off**  position to turn notification off.

### ***Install certificates***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.
3. Tap **Wi-Fi preferences** from the bottom of Wi-Fi screen.
4. Tap **Advanced > Install certificates** and follow the prompts to finish the setting.

### ***Set network rating provider***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Wi-Fi**.
3. Tap **Wi-Fi preferences** from the bottom of Wi-Fi screen.

4. Tap **Advanced** > **Network rating provider**.
5. Select your preferred network rating provider, like **Google**, or **None**.

### ***Wi-Fi Direct***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet** > **Wi-Fi**.
3. Tap **Wi-Fi preferences** from the bottom of Wi-Fi screen.
6. Tap **Advanced** > **Wi-Fi Direct** and follow the prompts to finish the setting.

### ***Check MAC address***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet** > **Wi-Fi**.
3. Tap **Wi-Fi preferences** from the bottom of Wi-Fi screen.
4. Tap **Advanced** > **MAC address**.

### ***Check IP address***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet** > **Wi-Fi**.
3. Tap **Wi-Fi preferences** from the bottom of Wi-Fi screen.
4. Tap **Advanced** > **IP address**.

## ***Mobile network***

Set your phone's access to networks and mobile data service.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Settings** > **Network & Internet** > **Mobile networks**.
  - **Mobile data**: Slide the Mobile data switch to the **On**  or **Off**  position to enable or disable the data access using mobile network.
  - **App data usage**: Tap to view the data used on mobile network.
  - **Preferred network type**: Change the network mode.
  - **Access Point Names**: Select or add APNs.
  - **System select**: Tap to change the CDMA roaming mode.

## *Data usage*

The data usage menu lets you view your phone's mobile and Wi-Fi data usage, set data limits, restrict hotspot usage, and more.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Data usage**.

### *Mobile data*

Monitor mobile data used.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Data usage > Mobile**.
3. Slide the **Mobile data** switch to the **On**  position to enable mobile data service.
4. Tap **Mobile data usage** to view the mobile data usage of each app.
5. Tap **Billing cycle**, you will see the following options:
  - **Billing cycle**: Set the day of the month to start the bill cycle for your phone.
  - **Set data warning**: Enable alerts when your mobile data usage reaches the amount you set.
  - **Data warning**: Set data amount for alert. Data usage measured by your phone is an approximate amount, and it may differ from the actual amount.
  - **Set data limit**: Enable data limit by sliding the switch to the **On**  position.
  - **Data limit**: Set data limit. Your phone will turn off mobile data when it reaches the limit you set.

### *Wi-Fi data*

Monitor Wi-Fi data used.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Data usage > Wi-Fi**.
3. Tap **Wi-Fi data usage** to view the Wi-Fi data usage of each app.

## *Hotspot & tethering*

Share your phone's internet connection to other devices.

## Wi-Fi hotspot

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Hotspot & tethering > Wi-Fi hotspot**.
3. Slide the Wi-Fi hotspot switch to the **On**  position to turn on Wi-Fi hotspot.
  - **Hotspot name:** Tap to set the hotspot name.
  - **Security:** Tap to select security mode.
  - **Hotspot password:** Tap to set hotspot password.
  - **Turn off hotspot automatically:** Slide the switch to the **On**  position to turn off hotspot automatically if no devices are connected.
  - **Reset OOB:** Tap to reset network SSID, security and password to the default settings.
  - **Maximum connection:** Tap to set the numbers of maximum connection users.
  - **Connected users:** View your connected users.
  - **Blocked users:** View your blocked users.

## USB tethering

Share your phone's internet connection via USB. Use a USB cable to connect your phone and your computer.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Hotspot & tethering > USB tethering**.
3. Slide the USB tethering switch to the **On**  position to turn on USB tethering.

## Bluetooth tethering

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Hotspot & tethering > Bluetooth tethering**.
3. Slide the Bluetooth tethering switch to the **On**  position to turn on Bluetooth tethering.

## Airplane mode

### Activate Airplane mode

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Airplane mode**.

3. Slide the Airplane mode switch to the **On**  or **Off**  position to turn Airplane mode on or off.

## *VPN (Virtual Private Networks)*

You need to set a lock screen PIN or password before you can use a VPN.

### *Add VPN profile*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > VPN**.
3. Tap  on the top right corner of the VPN screen to add VPN profile.
4. Follow the prompts to finish the settings of your VPN.

### *Edit and delete a VPN*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > VPN**.
3. Tap  next to a VPN.
4. Edit the VPN and tap **SAVE**.
5. Tap **DELETE** to delete the VPN.

### *Connect to a VPN*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > VPN**.
3. Tap a VPN, enter your log in information, and tap **CONNECT**.
  - To disconnect, tap the VPN, and tap **DISCONNECT**.

## *Private DNS*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Network & Internet > Private DNS**.
3. Select Private DNS mode. You can set private DNS mode as off or turn on automatically. You can also enter and edit the host name of DNS provider.

# Connected devices

## USB

You can connect your phone with your computer using a USB cable. When connected, you need to choose from the following settings before use.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **USB**.

- **USB controlled by:**
  - Connected device:** Set USB controlled by the connected device.
  - This device:** Set USB controlled by this device.
- **Use USB for:**
  - File transfer:** Select to transfer files between your phone and your computer.
  - USB tethering:** Select to set USB tethering mode.
  - MIDI:** Select to set this device as MIDI.
  - PTP:** Select to transfer PTP photos.
  - No data transfer:** Select to set no data transfer mode.

# Connection preferences

## Bluetooth

Your phone's Bluetooth capabilities let you use wireless headsets, send and receive pictures and files, and more.

1. From home, swipe up to access **Apps** and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.

### Enable Bluetooth

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.
3. Slide the Bluetooth switch to the On  or Off  position to turn it on or off.

### Pair a Bluetooth device

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.
3. Tap **Pair new devices**, select the device you want to connect in available devices list, and follow the prompts to connect. Make sure the devices you want to connect are set to be discovered.
  - Depending on the device, you may be required to enter or accept a passkey.
  - If the target device does not appear, tap **Refresh** to search again.
  - This setting is available when Bluetooth is enabled.

### ***Rename a paired device***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.
3. Tap **Settings**  next to a paired device name, enter a new name, and tap **OK** to save.
  - Emoji cannot be used in a device name.
  - This setting is available when Bluetooth is enabled.

### ***Unpair from a device***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.
3. Tap **Settings**  next to a paired device name, and tap **FORGET**.
  - This setting is available when Bluetooth is enabled.

### ***Enable service from a paired device***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.
3. Tap **Settings**  next to a paired device name and mark the checkbox next to **Internet access**.

### ***Search for other devices***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Bluetooth**.
3. Tap **Pair new device**.
  - All the devices searched out are listed under Available devices.
  - This setting is available when Bluetooth is enabled.

### ***Receive data with Bluetooth***

When a device attempts to send a file to your phone using Bluetooth, you will see a request screen displayed for accepting.

1. Tap **Accept**.
2. To view the file received, drag the status bar down and tap **File received**. Or you can locate the file from Bluetooth settings menu.

### ***Check received files***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences**.
3. Tap **Received files**.

### ***Cast***

Scan for nearby devices to connect to and set them up. A notification will appear when there are available devices to connect to.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Cast**.
3. Tap  to access options menu.
4. Tap **Enable wireless display**.
5. Tap a device to connect.

### ***Printing***

Connect your device to a printer on the same Wi-Fi network.

#### ***Default print service***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Printing**.
3. Tap **Default print service** and slide the switch to the **On**  position to turn it on.
4. Tap a printer to connect.

#### ***Add printer***

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Connected devices** > **Connection preferences** > **Printing**.
3. Tap **Default print service** and tap .
4. Tap **Add printer**.

# Apps & notifications

You can view current running applications, and manage the settings of notifications, permissions, and more.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications**

## Recently opened apps

View and manage your recently opened apps.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications**.
3. Tap an app to view the detailed information. Tap **DISABLE** to disable this app, and tap **FORCE STOP** to stop this app.

## Notifications

Manage your phone's notification settings.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications** > **Notifications**.
  - **On lock screen:** Tap to select **Show all notification content** or **Don't show notifications at all** on the lock screen.

- **Allow notification dots:** Slide the switch to the **On**  position to allow the display of notification dots on app icon.
- **Default notification sound:** Tap to select a default notification sound. You can also customize your own ringtone by tapping .
- **Do Not Disturb:** Tap to set Do Not Disturb behavior, exceptions, schedule, and turn it on or off.

## *Default apps*

Manage your phone's default apps.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications** > **Default apps**.
3. Tap to set default app for browser, phone, SMS, etc. And you can also set default apps for opening links.

## *App permissions*

Manage your phone's app permissions.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications** > **App permissions**.
3. Tap a function to view the current allowed apps.
  - Slide the switch to the **On**  or **Off**  position to modify the permissions.

## *Special app access*

Manage your phone's app permissions.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Apps & notifications** > **Special app access**.
3. Tap to view app access for special functions, such as unrestricted data, usage access, install unknown apps, display over other apps, picture-in-picture, etc.

# Battery

Monitor your phone's battery usage through this settings menu. Check the battery consumption and percentage.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Battery**.

- **Apps are running normally:** Indicate that your apps are using a normal amount of battery.
- **Standby intelligent power saving:** Slide the switch to the **On**  or **Off**  position to turn the standby intelligent power saving on or off.
- **Battery saver:** Slide the switch to the **On**  or **Off**  position to turn the battery saver on or off. You can set automatic turn on battery saver by tapping **Battery saver** > **Turn on automatically**.
- **Adaptive Battery:** Slide the switch to the **On**  or **Off**  position to turn the use adaptive battery function on or off.
- **Battery percentage:** Slide the switch to the **On**  position to show battery percentage in status bar.
- **Last full charge:** View the time of last full charge.
- **Screen usage since full charge:** View the time screen used since last full charge.

# Display

Use the phone's display settings menu to adjust items such as wallpaper, brightness, screen timeout, and more.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Display**.

- **Brightness level:** Tap to adjust brightness level. Drag the slider towards right or left to manually set brightness level.
- **Screen color mood:** Tap to adjust the color temperature. Drag the slider towards right or left to manually set color temperature.
- **Night light:** Tap to set night light schedule, intensity, and enable or disable turn on until sunrise.
- **Adaptive brightness:** Slide the switch to the **On**  or **Off**  position to turn the adaptive brightness mode on or off. When it is turned on, your phone will automatically adjust screen brightness based on the lighting conditions.
- **Wallpaper:** Tap to choose a picture to set as wallpaper.
- **Sleep:** Tap to set sleep duration. When set, your screen will be turned off after the sleep duration.
- **Auto-rotate screen:** Slide the switch to the **On**  or **Off**  position to turn the auto-rotate screen on or off.
- **Font size:** Drag the slider towards right or left to set font size. You can view sample text for reference.
- **Display size:** Drag the slider towards right or left to set the screen item display size. You can take the display of preview window for reference.

- **Screen saver:** Tap to select current screen saver, adjust screen saver settings, and set the time to start screen saver.

## Sound

The sound settings menu lets you control your phone's audio, from ringtones and alerts to tap tones and notifications.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Sound**.

- **Media volume:** Drag the slider towards right or left to set the strength of media volume.
- **Call volume:** Drag the slider towards right or left to set the strength of call volume.
- **Ring volume:** Drag the slider towards right or left to set the strength of ring volume.
- **Alarm volume:** Drag the slider towards right or left to set the strength of alarm volume.
- **Also vibrate for calls:** Slide the switch to the **On**  position to activate vibration for calls.
- **Do Not Disturb:** Tap to manage Do Not Disturb settings. Some notifications will be silenced when Do Not Disturb is turned on.

**Sound & vibration:** Tap to set which sounds are allowed while your device is in Do Not Disturb mode.

**Notifications:** Tap to adjust the settings of notifications when Do Not Disturb is turned on.

**Calls:** Tap to set the contacts who are allowed to call you while your device is in Do Not Disturb mode.

**Messages, events & reminders:** Tap to set if messages, events, and events are allowed while your device is in Do Not Disturb mode.

**Duration:** Tap to set Do Not Disturb duration.

**Turn on automatically:** Configure event and time rule for Do Not Disturb schedule.

- **Shortcut to prevent ringing:** Tap to set key pressing mode to prevent ringing.
- **Phone ringtone:** Tap to select a ringtone for incoming phone call. You can customize your own ringtone by tapping **Add ringtone**.
- **Default notification sound:** Tap to select default notification sound. You can customize your own notification sound by tapping ⊕.
- **Default alarm sound:** Tap to select default alarm sound. You can customize your own notification sound by tapping ⊕.
- **Other sounds and vibrations:** Tap to set other sounds and vibrations, such dial pad tones, screen locking sounds, charging sound, touch sounds, touch vibration, etc.

## Storage

The storage settings menu lets you manage internal storage on your phone and provides menu choices for an optional SD card (not included).

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Storage**.

- **Internal shared storage:**  
Tap to view storage amount used by each app.

You can free up some space by tapping **FREE UP SPACE**.

**Storage manager:** Storage manager removes backed up photos and videos from your device. Slide the switch to the **On**  or **Off**  position to turn storage manager on or off.

- **SD card:**

Tap **SD card** to view files stored on your SD card.

Tap  to unmount the card to allow for safe removal.

Tap **SD card** > **MOUNT** to mount the card and make it available for use.

Tap **SD card** >  > **Storage settings** > **Format** to format your SD card.

## *Security & location*

The security and location settings will help you to secure your device, protect your data, and keep your privacy.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location**.

### *Security status*

View current security status.

## Google Play Protect

Google will regularly check your device and prevent/warn about potential harm. Only apps from Play Store will be checked.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Google Play Protect**.
  - Tap  to start full scanning on your device.
  - Slide the **Scan device for security threats** switch to the **On**  or **Off**  position to enable or disable regular scanning on your device for security threats.
  - Slide the **Improve harmful app detection** switch to the **On**  or **Off**  position to send or not send unknown apps to Google for better detection.

## Find My Device

Find My Device helps you locate the device remotely, keep your data safe when your device is lost.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Find My Device**.
3. Slide the Find My Device switch to the **On**  position to activate Find My Device function.
4. Tap **Find My Device won't work** to get some help if needed.
5. There are several ways available for your selection to locate your device.

## Security update

Check if there is a new update to your system or to your security patch.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Security update**.
3. Tap **Check for update** to start checking.

## Device security

You can set a screen lock to protect your phone from others.

### Screen lock

1. From home, swipe up to access **Apps**, and tap **Settings** .

## 2. Tap **Security & location > Screen lock**.

- **None:** Don't set any screen lock.
- **Swipe:** Tap to set swipe as the screen lock.
- **Pattern:** Tap to set a lock pattern. Follow the prompts to finish the settings.

- **PIN:** Tap to set a PIN code as the screen lock.
- **Password:** Tap to set a password as the screen lock.

**Important:** To protect your phone and data from unauthorized access, it is recommended that you use the highest security level available (Password protection). It is also recommended you frequently change your password to ensure the safety of your phone and personal data. If you failed to enter the correct pattern, PIN, or password, after five attempts, you will be prompted to wait for 30 seconds before you can try again.

## 3. Tap next to Screen lock to adjust some settings on screen lock.

- **Make pattern visible:** Slide the switch to the **On**  position to make pattern visible.
- **Automatically lock:** Tap to set automatically lock time.
- **Power button instantly locks:** Slide the switch to the **On**  position to activate instant lock by power button.
- **Lock screen message:** Tap to set lock screen message.

## *Lock screen preferences*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Lock screen preferences**.

- **On the lock screen:** Tap to set how to display notifications on lock screen.
- **Add users from lock screen:** Slide the switch to the **On**  position to add users from lock screen.
- **Lock screen message:** Tap to set lock screen message.
- **Show lockdown option:** Slide the switch to the **On**  position to show lockdown option that turns off Smart Lock, fingerprint unlocking, and notifications on the lock screen.

## Face unlock

Unlock your phone by looking at it.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Face Unlock**.

**Important:** Face Unlock is less secure than a PIN, Pattern, password or fingerprint. Someone who looks like you could unlock your phone. Face Unlock can be used to unlock your phone even if you have configured a PIN, pattern, password or fingerprint.

3. Tap **SETUP** to add face data and activate Quick unlock mode.

## Smart lock

Unlock your device automatically on some conditions. For more information about smart lock, tap  to access options menu, and tap **How it works** or **Help**.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Smart lock**.
3. Tap **On-body detection** and slide the switch to the **On**  position to activate it. Your device will now be kept unlocked while it's on you.

## Privacy

### Location

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Location**.
3. Slide the use location switch to the **On**  position to turn location services on.

### Recent location requests

You can view a list of apps requested location access in recent.

## *App-level permissions*

Tap to view which apps have the permission to access location services.

### *Advanced*

#### 1. Scanning:

- **Wi-Fi scanning:** Improve location by allowing system apps and services to detect Wi-Fi networks at any time. Slide the switch to the **On**  position to turn it on.
- **Bluetooth scanning:** Improve location by allowing system apps and services to detect Bluetooth devices at any time. Slide the switch to the **On**  position to turn it on.

#### 2. Location services

- **Google Location Accuracy:** Slide the improve location accuracy switch to the **On**  position to use GPS, Wi-Fi, Bluetooth, mobile networks and sensors to determine your location.
- **Google Location History:** Tap to view your location history.
- **Google Location Sharing:** Tap to share your location.
- **Network Data Analytics**

## *Show passwords*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Show passwords**.
3. Slide the Show passwords switch to the **On**  or **Off**  position to display characters briefly as you type.

## *Device admin apps*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Advanced > Device admin apps**.
3. View device admin apps, and mark or unmark the checkbox to enable or disable it.

## *SIM card lock*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Advanced > Lock SIM card**.
3. Slide the Lock SIM card switch to the **On**  or **Off**  position turn SIM card lock on or off. It requires PIN to use your device.

4. Tap **Change SIM PIN** to change PIN code.

## *Encryption & credentials*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Encryption & credentials**.

**Encrypt phone:** Your phone is encrypted.

**Storage type:** Your phone's credential storage type is hardware-backed.

**Trusted credentials:** Tap to view trusted CA certificates.

**User credentials:** Tap to view and modify stored credentials.

**Install from SD card:** Tap to install certificates from SD card.

**Clear credentials:** Tap to remove all certificates.

## *Trust agents*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Trust agents**.
3. View your trusted agents. Slide the switch to the **On**  or **Off**  position to turn it on or off.

## *Screen pinning*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Security & location > Screen pinning**.
3. Slide the switch to the **On**  or **Off**  position to turn it on or off. When turned on, you can use screen pinning to keep the current screen in view until you unpin.

## *Accounts*

You can set up and manage all your accounts here, including your Google Account, other social networking accounts, etc.

## *Add account*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Users & accounts > Add account**.
3. Tap one of the account types.

4. Follow the prompts to enter your credentials and set up the account.

## *Automatically sync data*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Users & accounts > Automatically sync data**.
3. Slide the automatically sync data switch to the **On**  or **Off**  position to turn it on or off.

## *Accessibility*

The accessibility menu lets you enable and manage accessibility-related applications. Accessibility services are special features to make device easier to use for those with certain physical disabilities.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility**.

## *Volume key shortcut*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Volume key shortcut**.
3. Slide the switch to the **On**  or **Off**  position to turn it on or off. When the shortcut function is turned on, you can press both volume keys for 3 seconds to start an accessibility feature.
4. Tap **Shortcut service** to select a downloaded service as volume key shortcut function.

5. Slide the **Allow from lock screen** switch to the **On**  or **Off**  position to turn this function on or off.

## *Downloaded services*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Downloaded services**.
3. View your downloaded accessibility apps.

## *Screen readers*

### *Text-to-speech output*

1. From home, swipe up to access **Apps**, and tap **Settings** .
  2. Tap **Accessibility > Text-to-speech output**.
- **Preferred engine:** Tap to set Text-to-speech engine. Tap  to manage TTS settings.

**Install voice data:** Tap to select a language and download the language voice data.

**Use Wi-Fi only:** Slide the switch to the **On**  position to enable using only Wi-Fi to download voices data.

**Amplify speech volume:** Slide the switch to the **On**  position to make spoken text louder than normal.

**Intonation:** Tap to set intonation options.

**Number processing:** Slide the switch to the **On**  position to enable number processing, which will affect how dates and times are spoken.

**Language detection:** Tap to set language detection as **Off**, **Conservative**, or **Aggressive**.

**Anonymous usage reports:** Slide the switch to the **On**  position to activate anonymous usage reports function, which will help to better understand the performance of Text-to-speech function on your device.

**Feedback:** Tap to write your feedback about this function.

- **Language:** Tap to set the language for using this function.
- **Speech rate:** Drag the slider to the right or left to adjust speech rate.
- **Pitch:** Drag the slider to the right or left to adjust pitch.
- Tap **PLAY** to play the example.

- Tap **RESET** to reset all Text-to-speech settings to the default settings.

## *Display*

### *Font size*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Font size**.
3. Drag the slider to the right or left to adjust the font size.

### *Display size*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Display size**.
3. Tap **+** or **-** to make the items on your screen smaller or larger.

### *Magnification*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Magnification**.
  - **Magnify with triple-tap**: Slide the switch to the **On**  or **Off**  position to enable or disable magnify with triple-tap.
  - **Magnify with button**: Slide the switch to the **On**  or **Off**  position to enable or disable quickly magnify by accessibility button at the bottom of the screen.

### *Color correction*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Color correction**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable color correction function. It may affect device performance.
  - **Correction mode**: Tap to select color correction mode.

### *Color inversion*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Color inversion**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable color inversion mode. It may affect device performance.

## *Large mouse pointer*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Large mouse pointer**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable large mouse pointer function.

## *Remove animations*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Remove animations**.
3. Slide the switch to the **On**  or **Off**  position to turn it on or off.

## *Interaction controls*

### *Dwell timing*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Dwell timing**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable click automatically after pointer stops moving.

### *Power button ends call*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Power button ends call**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable power button ends call function.

### *Auto-rotate screen*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Auto-rotate screen**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable screen automatically rotate.

### *Touch & hold delay*

1. From home, swipe up to access **Apps**, and tap **Settings** .

2. Tap **Accessibility > Touch & hold delay**.
3. Tap to set touch & hold delay as **Short**, **Medium** or **Long**.

## *Audio & on-screen text*

### *Mono audio*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Mono audio**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable Mono audio function.

### *Sound balance*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Sound balance**.
3. Drag the slider to the right or left to adjust the sound balance.

### *Captions*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > Captions**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable captions function.
4. You can also set caption display language, text size and caption style.

## *Experimental options*

### *High contrast text*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **Accessibility > High contrast text**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable high contrast text display.

## *Google*

Configure your device's Google settings. Available options depend on your Google account.

1. From home, swipe up to access **Apps**, and tap **Settings** .

2. Tap **Google**.
3. Select an option to customize.

## System

The following topics detail your phone's system settings options, including language and input settings, battery and storage, date and time, activation, system update, and device information.

### Languages & input

Your phone's language and input settings let you select a language for the phone's menus and keyboards, select and configure keyboard settings, configure speech input settings, and set your phone's mouse/track pad options.

#### Languages

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System** > **Language & input** > **Languages**.

- View currently selected languages. When there is more than one language selected, you can drag one language up to the first position to set as the default display language.
- Tap **Add a language** to add a language from system language list.
- Tap  to access options menu, and tap **Remove** to remove languages.

#### Keyboard & inputs

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System** > **Language & input** > **Keyboard & inputs**.

- **Visual keyboard:** Tap to view current visual keyboards.  
**Manage keyboards:** Tap to activate or deactivate current visual keyboards.
- **Physical keyboard:** Tap to view physical keyboard settings.  
**Show virtual keyboard:** Slide the switch to the **On**  or **Off**  position to enable or disable the display of virtual keyboard while physical keyboard is active.  
**Keyboard shortcuts helper:** Tap to set keyboard shortcuts.

## *Input assistance*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Language & input > Input assistance**.
  - **Spell checker:** Slide the switch to the **On**  or **Off**  position to enable or disable spell checker function.  
**Languages:** Tap to select languages.  
**Default spell checker:** Tap to select default spell checker.
  - **Auto-fill service:** Tap to activate or deactivate auto fill function.
  - **Personal dictionary:** Tap to maintain your own dictionary. Tap  to add a word to the dictionary.
  - **Pointer speed:** Tap to set the speed of the pointer for a mouse/track pad
  - **Text-to-speech output:** Tap to manage settings on Text-to-speech function.

## *Gestures*

### *Jump to camera*

Jump to camera is a function to quickly open Camera.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Gestures > Jump to camera**.
3. Slide the switch to the **On**  or **Off**  position to enable or disable Jump to camera function. When enabled, press the **Power** key twice to quickly open Camera. It works from any screen.

### *Swipe up on Home button*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Gestures > Swipe up on Home button**.

3. Slide the switch to the **On**  or **Off**  position to enable or disable Swipe up on Home button function. When enabled, swipe up on the Home button to switch apps, and swipe up again to see all apps. It works from any screen.

## *Prevent ringing*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Gestures > Prevent ringing**.
3. Tap to assign **Vibrate**, **Mute**, or **Do nothing** to the action of pressing **Power** and **Volume Up** key together.

## *Date & time*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Date & time**.
  - **Automatic date & time**: Tap to set how automatic date & time was provided. You can select **Use network-provided time** or **Use GPS-provided time**. Or you can select **Off** to turn this function off.
  - **Set date**: Tap to set date manually. This option available only when automatic date & time function is turned off.
  - **Set time**: Tap to set time manually. This option available only when automatic date & time function is turned off.
  - **Automatic time zone**: Slide the switch to the **On**  or **Off**  position to enable or disable this function.
  - **Select time zone**: Tap to select your time zone. This option available only when automatic time zone function is turned off.
  - **Automatic 24-hour format**: Slide the switch to the **On**  or **Off**  position to activate or deactivate Automatic 24-hour format.
  - **Use 24-hour format**: Slide the switch to the **On**  or **Off**  position to activate or deactivate 24-hour format.

## *Backup*

Your phone's Backup settings lets you back up your phone's data and settings to Google servers before resetting your phone to the original factory settings.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Back up**.

- Slide the **Back up to Google Drive** switch to the **On**  or **Off**  position to turn it on or off. Backup includes Apps data, Call history, Contacts, Messages, device settings, etc.

## *Reset options*

1. From home, swipe up to access **Apps**, and tap **Settings** .
3. Tap **System > Reset options**.
  - **DRM reset**: The reset mode will delete all DRM licenses.
  - **Reset Wi-Fi, mobile & Bluetooth**: This reset mode will reset all network settings, including Wi-Fi, Mobile data, and Bluetooth. Tap **RESET SETTINGS** to perform the reset.
  - **Reset app preferences**: This reset mode will reset all app preferences, including disabled apps, disabled app notifications, default apps, background data restrictions, etc. Tap **RESET APPS** to perform the reset.
  - **Erase all data (factory reset)**: This reset mode will erase all data from your phone's internal storage. Tap **RESET PHONE** to perform the reset.

**Tip:** Before performing a factory data reset on your phone, you may want to unmount an installed SD memory card to avoid losing any data you may have stored on it.

## *Multiple users*

You can share this device with other people by creating additional users. Each user has their own space, which they can customize with apps, wallpaper, and so on. Users can also adjust device settings like Wi-Fi that affect everyone.

### *Edit profile info*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Multiple users**.
3. Tap **You (Owner)**.

4. Enter a name.
5. Tap  to add a photo.
6. Tap **OK** to confirm.

### *Add new users*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Multiple users**.
3. Tap **Add user** and finish the later steps.

### *Switch users*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Multiple users**.
3. Tap the name of the user you want to switch to.

### *Remove users*

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > Multiple users**.

When you are at owner/admin mode, tap  by the side of other user's name, and tap **Remove user** to remove.

When you are not at owner's mode, tap **Remove** [name of the user].

Pls note that all apps and data of this removed user will be deleted.

## System updates

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > System updates**.
  - **Update profile**: Tap to update your profile.
  - **Update PRL**: Tap to update the preferred roaming list.
  - **System update**: Tap to check for system update.
  - **UICC unlock**: Your phone is locked to a Sprint SIM only, so this function is not available to set

## About phone

The about phone menu lets you access important phone information, search for and apply updates, and view legal and safety information.

1. From home, swipe up to access **Apps**, and tap **Settings** .
2. Tap **System > About phone**.
  - **Device name**: Tap to edit your phone's display name.
  - **Phone number**: Display your phone number.
  - **Emergency information**: Adding medical information and emergency contacts can help first responders in an emergency. Anyone can read this information from your lock screen, and dial your contacts by tapping their names, without unlocking your phone.  
**Medical information**: Tap **Edit information** to add your medical information, like name, address, blood type, allergies, etc.  
**Emergency contacts**: Tap **Add contact** to choose a contact as your emergency contact.
  - **Legal information**: Tap to view your device's legal information, including third-party licenses, Google legal, system WebView licenses, etc..
  - **SIM status**: Tap to view your SIM status information, like network, phone number on SIM, Mobile network state, etc.
  - **Model & hardware**: Display your device's model and hardware information.
  - **IMEI**: Display your device's IMEI.
  - **ICCID**: Display your device's ICCID.
  - **IMSI**: Display your device's IMSI.

- **MEID:** Tap to view your device's MEID information.
- **Brand:** Display your device's brand information.
- **Regulatory & safety:** Tap to view your device's regulatory & safety information.
- **Android version:** Tap to view your device's Android version and other relevant information, like Baseband version, Kernel version, Build number, etc.
- **IP address:** Display your device's IP address.
- **Wi-Fi MAC address:** Display your device's Wi-Fi MAC address.
- **Bluetooth address:** Display your device's Bluetooth address.
- **Build number:** Display your device's build number.
- **Software version:** Display your device's software version.
- **Hardware version:** Display your device's hardware version.

# ***Getting help***

---

The topics in this section will cover troubleshooting tips, phone specifications, and how to contact customer service.

# For assistance

## Troubleshooting

Check the questions and answers below for troubleshooting solutions for common phone issues.

### Check here first

**Question:** Phone freezes/operation is unstable.

**Answer:** Turn the phone on again. If you are unable to turn the phone off, remove and replace the Battery, and then turn the phone on again. Data that was being edited is erased after your phone is powered on again.

**Question:** Operation is unstable after a new application was installed.

**Answer:** The newly installed application may be the cause. Uninstall the application in Safe mode. See [Uninstall an App](#). To turn the phone on in Safe mode:

- Press and hold the **Power** key > touch and hold **Power off**, read the disclaimer for safe mode, and then tap **OK**.
  - o After turning the phone on in Safe mode, "Safe Mode" appears at lower left.
  - o After restarting in Safe mode, your phone can be powered on as usual.
  - o Before turning the phone on in Safe mode, it is recommended that you back up important data.
  - o By powering the phone on in Safe mode, added widgets may be deleted.

**Question:** Cannot use phone, mail, or Internet.

**Answer 1:** Check whether you are where signal is weak or out of service area.

**Answer 2:** Power the phone on again.

**Answer 3:** Is the phone in Airplane mode? To check that Airplane mode is canceled:

- From home, swipe up to access **Apps**, and tap **Settings**  > **Network & Internet** > **Airplane mode**.

**Answer 4:** Is data communication disabled? To check that data communication is enabled:

- From home, swipe up to access **Apps**, and tap **Settings**  > **Network & Internet** > **Mobile network**.

**Question:** Battery level goes down quickly.

**Answer:** Are you where signal is weak or have been out of service area for a long period? Calling where signal is weak or being out of service area uses a lot of Battery.

**Question:** Cannot install applications.

**Answer:** Applications cannot be installed with only a little free space on the phone or SD card. To check free space, see Storage settings. Applications not supported by your phone cannot be installed.

**Question:** Cannot unlock screen.

**Answer:** Power the phone on again. If you are unable to turn the phone off, remove and replace the Battery, and then power the phone on again. Data that was being edited is erased after the phone is powered on again.

## Specifications

The following tables list your phone's and battery's specifications.

### Phone specifications

Item	Description
<b>Weight</b>	Approx. 176 g. (6.2 oz.)
<b>Continuous talk time</b>	CDMA: Approx. 20 hours
<b>Continuous standby time</b>	CDMA: Approx. 440 hours 4G: Approx. 400 hours
<b>Charging time</b>	Approx. 3.5 hours
<b>Dimensions (W x H x D)</b>	Approx. 72.6 x 150 x 9.8 mm (2.86" x 5.9" x 0.39")
<b>Display</b>	5.5 inch, FWVGA+
<b>Processor</b>	2.0GHz, 4*Cortex A53, 64bit
<b>Cameras</b>	Rear: 5M, Front: 2M
<b>Memory</b>	16GB eMMC+16Gb LPDDR3
<b>Carrier Aggregation</b>	2CA
<b>Maximum output</b>	CDMA: 0.25 W LTE: 0.2 W
<b>Communication speed</b>	2G: CDMA 2K1X (153.6 Kbit/s DL, 153.6 Kbit/s UL) 3G: EVDO (3.1M bit/s DL, 1.8 Mbit/s UL) 4G: Cat 7 (300Mbit/s DL, 100Mbit/s UL)
<b>Android version</b>	Android™ 9.0

### *Battery specifications*

<b>Item</b>	<b>Description</b>
<b>Voltage</b>	4.35 V
<b>Type</b>	Lithium-ion
<b>Capacity</b>	2500 mAh
<b>Dimensions (W x H x D)</b>	Approx. 60 mm x 77 mm x 4.45 mm (2.36" x 3.03" x 0.18")

# ***Safety and use***

---

The topics in this section will introduce the safety and use information.

## *Please read before proceeding*

THE BATTERY IS NOT FULLY CHARGED WHEN YOU TAKE IT OUT OF THE BOX. DO NOT REMOVE THE BATTERY PACK WHEN THE PHONE IS CHARGING. YOUR WARRANTY IS INVALIDATED IF YOU DISASSEMBLE OR ATTEMPT TO DISASSEMBLE THE DEVICE.

### *Privacy restrictions*

Some countries require full disclosure of recorded telephone conversations, and stipulate that you must inform the person with whom you are speaking that the conversation is being recorded. Always obey the relevant laws and regulations of your country when using the recording feature of your phone.

### *Disclaimers*

ANY WEATHER, STOCK, OR OTHER INFORMATION, DATA, OR DOCUMENTATION (“ACCESSED INFORMATION”) ARE PROVIDED “AS IS” AND WITHOUT ANY WARRANTY OR ANY TECHNICAL SUPPORT. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, WIKO USA AND ITS AFFILIATES expressly disclaim any and all representations and warranties, arising by law or otherwise, related to the Accessed Information, including without limitation any express or implied representation or warranty of merchantability, fitness for a particular purpose, non-infringement, quality, accuracy, completeness, effectiveness, reliability, or usefulness. Without limiting the foregoing, it is further understood that WIKO USA and its Affiliates are not responsible for any use of the Accessed Information or the results arising from such use and that you use such information at your own risk.

To obey relative USA law or state law if the laws stipulate inconsistently with the above provision.

### *Limitation of damages*

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL WIKO USA OR ITS AFFILIATES BE LIABLE TO YOU, ANY USER, OR THIRD PARTY FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE DAMAGES OF ANY KIND, ARISING IN CONTRACT, TORT, OR OTHERWISE, INCLUDING, BUT NOT LIMITED TO, INJURY, LOSS OF REVENUE, LOSS OF GOODWILL, LOSS OF BUSINESS OPPORTUNITY, LOSS OF DATA, AND/OR LOSS OF PROFITS, REGARDLESS OF THE FORESEEABILITY THEREOF OR WHETHER WIKO USA OR ITS AFFILIATES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. AND IN NO EVENT SHALL THE TOTAL LIABILITY OF WIKO USA OR ITS AFFILIATES EXCEED THE AMOUNT RECEIVED FROM YOU, REGARDLESS OF THE LEGAL THEORY UNDER WHICH THE CAUSE OF ACTION IS BROUGHT. THE FOREGOING DOES NOT AFFECT ANY STATUTORY RIGHTS WHICH MAY NOT BE DISCLAIMED.

To obey relative USA law or state law if the laws stipulate inconsistently with the above provision.

# *Important health information and safety precautions*

When using this product, the safety precautions below must be taken to avoid possible legal liabilities and damages. Retain and follow all product safety and operating instructions. Observe all warnings in the operating instructions on the product.

To reduce the risk of bodily injury, electric shock, fire and damage to the equipment, observe the following precautions.

## *Electrical safety*

This product is intended for use when supplied with power from the designated battery or power supply unit. Other usage may be dangerous and will invalidate any approval given to this product.

## *Safety precautions for proper grounding installation*

**Warning: Connecting to improperly grounded equipment can result in an electric shock to your device.**

This product is equipped with a USB Cable for connecting with desktop or notebook computer. Be sure your computer is properly grounded (earthed) before connecting this product to the computer. The power supply cord of a desktop or notebook computer has an equipment grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet which is properly installed and grounded in accordance with all local codes and ordinances.

## *Safety precautions for power supply unit*

### *Use the correct external power source*

A product should be operated only from the type of power source indicated on the electrical ratings label. If you are not sure of the type of power source required, consult your authorized service provider or local power company. For a product that operates from battery power or other sources, refer to the operating instructions that are included with the product.

This product should be operated only with the following designated power supply unit(s).

Travel charge: Input: 100-240V, 50/60Hz, 0.15A. Output: 5V, 1000mA

### *Handle battery packs carefully*

This product contains a Lithium-ion polymer or Lithium-ion battery. There is a risk of fire and burns if the battery pack is handled improperly. Do not attempt to open or service the battery pack. Do not disassemble, crush, puncture, short external contacts or circuits, dispose of in fire or water, or expose a battery pack to temperatures higher than 113°F (45°C). The operating temperature for the phone is -14°F (-10°C) to 113°F (45°C).

**Warning: Danger of explosion if battery is incorrectly replaced.**

To reduce risk of fire or burns, do not disassemble, crush, puncture, short external contacts, expose to temperature above 113°F (45°C), or dispose of in fire or water. Replace only with specified batteries. Recycle or dispose of used batteries according to the local regulations or reference guide supplied with your product.

**Take extra precautions**

- Do not disassemble or open, crush, bend or deform, puncture or shred.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- The phone should only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Battery usage by children should be supervised.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirement for Battery System Compliance to IEEE1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage or other hazard.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
- Promptly dispose of used batteries in accordance with local regulations.
- Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
- Improper battery use may result in a fire, explosion or other hazard.
- If the battery leaks:
  - o Do not allow the leaking fluid to come in contact with skin or clothing. If already in contact, flush the affected area immediately with clean water and seek medical advice.
  - o Do not allow the leaking fluid to come in contact with eyes. If already in contact, DO NOT rub; rinse with clean water immediately and seek medical advice.

- o Take extra precautions to keep a leaking battery away from fire as there is a danger of ignition or explosion.

### *Safety precautions for direct sunlight*

Keep this product away from excessive moisture and extreme temperatures. Do not leave the product or its battery inside a vehicle or in places where the temperature may exceed 113°F (45°C), such as on a car dashboard, window sill, or behind a glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage the product, overheat the battery, or pose a risk to the vehicle.

### *Prevention of hearing loss*

Permanent hearing loss may occur if earphones or headphones are used at high volume for prolonged periods of time.

### *Safety in aircraft*

Due to the possible interference caused by this product to an aircraft's navigation system and its communications network, using this device's phone function on board an airplane is against the law in most countries. If you want to use this device when on board an aircraft, remember to turn off your RF on your phone by switching to Airplane Mode.

### *Environment restrictions*

Do not use this product in gas stations, fuel depots, chemical plants or where blasting operations are in progress, or in potentially explosive atmospheres such as fueling areas, fuel storehouses, below deck on boats, chemical plants, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Please be aware that sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

### *Explosive atmospheres*

When in any area with a potentially explosive atmosphere or where flammable materials exist, the product should be turned off and the user should obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Users are advised not to use the equipment at refueling points, such as service or gas stations, and are reminded of the need to observe restrictions on the use of radio equipment in fuel depots, chemical plants, or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. These include fueling areas, below deck on boats, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

### *Road safety*

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a phone while driving (even with a hands-free kit) causes distraction and can lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

## *Safety precautions for RF exposure*

- Avoid using your phone near metal structures (for example, the steel frame of a building).
- Avoid using your phone near strong electromagnetic sources, such as microwave ovens, sound speakers, TV and radio.
- Use only original manufacturer-approved accessories, or accessories that do not contain any metal.
- Use of non-original manufacturer-approved accessories may violate your local RF exposure guidelines and should be avoided.

## *Interference with medical equipment functions*

This product may cause medical equipment to malfunction. The use of this device is forbidden in most hospitals and medical clinics.

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your health care provider may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

## *Non-ionizing radiation*

Your device has an internal antenna. This product should be operated in its normal-use position to ensure the radioactive performance and safety of the interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of the equipment and for the safety of personnel, it is recommended that no part of the human body be allowed to come too close to the antenna during operation of the equipment.

Use only the supplied integral antenna. Use of unauthorized or modified antennas may impair call quality and damage the phone, causing loss of performance and SAR levels exceeding the recommended limits as well as result in noncompliance with local regulatory requirements in your country.

To assure optimal phone performance and ensure human exposure to RF energy is within the guidelines set forth in the relevant standards, always use your device only in its normal-use position. Contact with the antenna area may impair call quality and cause your device to operate at a higher power level than needed.

Avoiding contact with the antenna area when the phone is IN USE optimizes the antenna performance and the battery life.

## *Electrical safety*

### **Accessories**

- Use only approved accessories.

- Do not connect with incompatible products or accessories.
- Take care not to touch or allow metal objects, such as coins or key rings, to contact or short circuit the battery terminals.

### ***Connection to a car***

Seek professional advice when connecting a phone interface to the vehicle electrical system.

### ***Faulty and damaged products***

- Do not attempt to disassemble the phone or its accessory.
- Only qualified personnel must service or repair the phone or its accessory.

### ***General precautions***

You alone are responsible for how you use your phone and any consequences of its use. You must always switch off your phone wherever the use of a phone is prohibited. Use of your phone is subject to safety measures designed to protect users and their environment.

### ***Avoid applying excessive pressure to the device***

Do not apply excessive pressure on the screen and the device to prevent damaging them and remove the device from your pants' pocket before sitting down. It is also recommended that you store the device in a protective case and only use the device stylus or your finger when interacting with the touch screen. Cracked display screens due to improper handling are not covered by the warranty.

### ***Device getting warm after prolonged use***

When using your device for prolonged periods of time, such as when you're talking on the phone, charging the battery or browsing the Web, the device may become warm. In most cases, this condition is normal and therefore should not be interpreted as a problem with the device.

### ***Heed service markings***

Except as explained elsewhere in the Operating or Service documentation, do not service any product yourself. Service needed on components inside the device should be done by an authorized service technician or provider.

### ***Protect your phone***

- Always treat your phone and its accessories with care and keep them in a clean and dust-free place.
- Do not expose your phone or its accessories to open flames or lit tobacco products.
- Do not expose your phone or its accessories to liquid, moisture or high humidity.
- Do not drop, throw or try to bend your phone or its accessories.

- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its accessories.
- Do not paint your phone or its accessories.
- Do not attempt to disassemble your phone or its accessories, only authorized personnel must do so.
- Do not expose your phone or its accessories to extreme temperatures, minimum -14°F (-10°C) and maximum 113°F (45°C).
- Please check local regulations for disposal of electronic products.
- Do not carry your phone in your back pocket as it could break when you sit down.

### ***Damage requiring service***

Unplug the product from the electrical outlet and refer servicing to an authorized service technician or provider under the following conditions:

- Liquid has been spilled or an object has fallen into the product.
- The product has been exposed to rain or water.
- The product has been dropped or damaged.
- There are noticeable signs of overheating.
- The product does not operate normally when you follow the operating instructions.

### ***Avoid hot areas***

The product should be placed away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

### ***Avoid wet areas***

Never use the product in a wet location.

### ***Avoid using your device after a dramatic change in temperature***

When you move your device between environments with very different temperature and/or humidity ranges, condensation may form on or within the device. To avoid damaging the device, allow sufficient time for the moisture to evaporate before using the device.

**NOTICE:** When taking the device from low temperature conditions into a warmer environment or from high-temperature conditions into a cooler environment, allow the device to acclimate to room temperature before turning on power.

### ***Avoid pushing objects into product***

Never push objects of any kind into cabinet slots or other openings in the product. Slots and openings are provided for ventilation. These openings must not be blocked or covered.

### ***Air bags***

Do not place a phone in the area over an air bag or in the air bag deployment area. Store the phone safely before driving your vehicle.

### ***Mounting accessories***

Do not use the product on an unstable table, cart, stand, tripod, or bracket. Any mounting of the product should follow the manufacturer's instructions and should use a mounting accessory recommended by the manufacturer.

### ***Avoid unstable mounting***

Do not place the product with an unstable base.

### ***Use product with approved equipment***

This product should be used only with personal computers and options identified as suitable for use with your equipment.

### ***Adjust the volume***

Turn down the volume before using headphones or other audio devices.

### ***Cleaning***

Unplug the product from the wall outlet before cleaning.

Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning, but NEVER use water to clean the LCD screen.

### ***Small children***

Do not leave your phone and its accessories within the reach of small children or allow them to play with it. They could hurt themselves, or others, or could accidentally damage the phone. Your phone contains small parts with sharp edges that may cause an injury, or which could become detached and create a choking hazard.

### ***Repetitive motion injuries***

To minimize the risk of RSI, when texting or playing games with your phone:

- Do not grip the phone too tightly.
- Press the buttons lightly.
- Make use of the special features in the handset which minimize the number of buttons which have to be pressed, such as message templates and predictive text.
- Take lots of breaks to stretch and relax.

### ***Operating machinery***

Full attention must be given to operating the machinery in order to reduce the risk of an accident.

### ***Loud noise***

This phone is capable of producing loud noises which may damage your hearing.

### ***Emergency calls***

This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.

## ***Regulatory agency identifications***

### ***FCC Regulations***

This mobile phone complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### ***RF Exposure Information (SAR)***

This mobile phone meets the government's requirements for exposure to radio waves. This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC

with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 0.91 W/kg and when worn on the body, as described in this user guide, is 1.34 W/kg (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements.)

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/ea/fccid](http://www.fcc.gov/oet/ea/fccid) after searching on FCC ID: 2AM86WU300AS.

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.

## ***HEARING AID COMPATIBILITY HAC FOR WIRELESS TELECOMMUNICATIONS DEVICES***

**THIS PHONE HAS A HAC RATING OF M3/T3.**

### ***WHAT IS HEARING AID COMPATIBILITY?***

The Federal Communications Commission has implemented rules and a rating system designed to enable people who wear hearing aids to more effectively use these wireless telecommunications devices. The standard for compatibility of digital wireless phones with hearing aids is set forth in American National Standard Institute (ANSI) standard C63.19. There are two sets of ANSI standards with ratings from one to four (four being the best rating): an “M” rating for reduced interference making it easier to hear conversations on the phone when using the hearing aid microphone, and a “T” rating that enables the phone to be used with hearing aids operating in the tele-coil mode thus reducing unwanted background noise.

### ***HOW WILL I KNOW WHICH WIRELESS PHONES ARE HEARING AID COMPATIBLE?***

The Hearing Aid Compatibility rating is displayed on the wireless phone box. A phone is considered Hearing Aid Compatible for acoustic coupling (microphone mode) if it has an “M3” or “M4” rating. A digital wireless phone is considered Hearing Aid Compatible for inductive coupling (tele-coil mode) if it has a “T3” or “T4” rating.

*HOW WILL I KNOW IF MY HEARING AID WILL WORK WITH A PARTICULAR DIGITAL WIRELESS PHONE?*

You'll want to try a number of wireless phones so that you can decide which works the best with your hearing aids.

You may also want to talk with your hearing aid professional about the extent to which your hearing aids are immune to interference, if they have wireless phone shielding, and whether your hearing aid has a HAC rating.
